FIVE CENTS

ATLANTA, GA., SUNDAY MORNING, JUNE 6, 1915

FIVE CENTS

Sports Clothes

THE left tennis rig of blue-and-white gingham is smart and practical. The skirt is boxpleated to a hip-line of plain blue. The pocket and shoulder straps are of the plaid.

THE riding togs are correct from the crown of the hat, black sailor with its white kid band to the shiny black boots, including the unlined black serge coat with white collar and lapels, the "sporty" vest of black-and-white checked madras and the white linen breeches.

NEW blazers of Italian silk, like the orange one, promise to be very popular with the athletic girl. A new sports skirt of white corduroy is shown with thin, deep hem pockets buttoned up on either side.

Illustrated by Gordon

THE ATLANTA CONSTITUTION

IMPROVE SCHOOLS SPECIAL MESSAGE TO COUNCIL MONDAY CALLING ATTENTION TO NECESSITY OF BETTER EQUIPMENT OF SYSTEM

**CENTRAL HIGH SCHOOL
GIVEN HIS INDORSEMENT**

Hundreds of children now
Face Possibility of Being
Denied Entrance to the
Grammar Schools Next
Fall, He Says.

Mayor James G. Woodward, in a message to general council, that has been filed with the city clerk, to be read before council Monday morning, makes a strong and vigorous plea for the public schools of Atlanta and appeals to council and the board of education to unite in placing the schools upon their former high standard of superiority.

The tenor of the message reflects the sentiment of the school system, and generalizations that have combined their efforts toward offering Atlanta children educational advantages the equal of any in the country.

While not minimizing the importance of the high schools, the mayor takes the position that the grammar schools should be given first consideration, for he says "It is the duty of the city to give first consideration to the grammar schools, as they are the basis upon which our entire educational system rests, as they affect practically every household in the city."

Indorsement Consolidation.
The mayor unqualifiedly indorses the movement to consolidate the schools of the city and calls attention to the fact that in the past year the city has made considerable progress in this regard. He says: "I sincerely trust the day may soon come when this consolidation will be effected, erecting somewhere within easy reach to all parts of the city a splendid temple to education."

Of immediate needs and the importance of providing for the children of the city, the mayor says: "As the situation now stands, hundreds of children are denied the opportunity of attending the grammar schools, and the city is faced with the necessity of erecting double sessions. I especially direct your attention to the need of the grammar schools."

He urges council to delay carrying on other schemes and improvements for a time. He says they can easily wait "until the city has made provision for an education next returns."

Will Work for Schools.
With the mayor, general council and board of education in thorough accord on the school situation, it is freely predicted that Atlanta's school system will experience marked improvement in the near future. The mayor declared that he has no doubt that the city will be able to meet the needs of the city before the end of the year, a concerted effort with other institutions that have grown up since the city's consolidation. He says that the city is making up the June appropriation and that he will consider the schools first, the most important of the city's work. He says that he will make appropriate provision for the city's needs and to see that the city's work is properly carried on.

The mayor does not attempt to discuss the proposition of consolidating the schools and the board of education, but he puts on record his own opinion of the city's work with general council in devising some practical method.

Woodward's Message.
Mayor Woodward's message to general council follows:

Atlanta, Ga., June 5, 1915.
The General Council, City of Atlanta, Georgia: I respectfully call the attention of your honorable body to the necessity of better equipment of the school system of this city. The city's schools have held an enviable position in the educational world, and it is pointed to with pride as one of the city's assets.

Atlanta has grown rapidly in the past few years and the growth of the city has not been in proportion to the city's growth. As the situation now stands, hundreds of children face the possibility of being denied entrance to the grammar schools, and the city is faced with the necessity of erecting double sessions. I especially direct your attention to the need of the grammar schools.

I am minimizing the importance of the high schools, and the growth of the city is such that it is only one of the other—of the city's schools or of the city's growth. I am not saying that the city's schools are not doing well, but I am saying that the city's schools are not doing as well as they should be, and it is the duty of the city to place them upon their former high standard of superiority.

I sincerely trust the day may soon come when this consolidation will be effected, erecting somewhere within easy reach to all parts of the city a splendid temple to education.

I am not saying that the city's schools are not doing well, but I am saying that the city's schools are not doing as well as they should be, and it is the duty of the city to place them upon their former high standard of superiority.

I am not saying that the city's schools are not doing well, but I am saying that the city's schools are not doing as well as they should be, and it is the duty of the city to place them upon their former high standard of superiority.

I am not saying that the city's schools are not doing well, but I am saying that the city's schools are not doing as well as they should be, and it is the duty of the city to place them upon their former high standard of superiority.

I am not saying that the city's schools are not doing well, but I am saying that the city's schools are not doing as well as they should be, and it is the duty of the city to place them upon their former high standard of superiority.

I am not saying that the city's schools are not doing well, but I am saying that the city's schools are not doing as well as they should be, and it is the duty of the city to place them upon their former high standard of superiority.

BABY JOHN D. ASTOR SPENDS \$30,000 YEAR

**Widow of Titanic Victim Tells
How She Cares for Post-humous Child.**

New York, June 5.—John Jacob Astor, who perished on the Titanic, has been living at the rate of approximately \$30,000 a year, according to the accounting filed with the state today by his mother, Mrs. Madeleine Force Astor, who is his guardian.

The court allowed Mrs. Astor \$60,000 for the child's maintenance for three years, or \$30,000 a year. The accounting filed today by Mrs. Astor shows that she has spent \$21,339 of her own money in addition for his maintenance. Chief items in the accounting are one-third of \$30,000 a year, or \$10,000 a year, for the services of physicians, lawyers and other professionals; \$10,000 a year for clothing, shoes and toys.

Mrs. Astor asserts that she is informed that the income on the trust left by John Jacob Astor for the child is approximately \$140,000, and upon this assumption contends that it was Colonel Astor's wish that his son be amply provided for.

COCKTAILS CONCEALING PROBE SALE OF DRUGS

**Numerous Warrants Are
Likely to Be Issued Soon
Against Physicians and
Druggists of Atlanta.**

Three fashionably clad women—two of them the wives of business men and the third a young girl—appeared before Judge Colquitt, commissioner of the city of Atlanta, last week and testified that they were drug habitués and were unable to do without allowances of morphine.

Their testimony was delivered in the case that has been made against Dr. Virgil C. Cooke, one of the city's best known physicians, who was arraigned before Commissioner Colquitt on a charge of violating the recently enacted Harrison law curtailing the traffic in drugs and narcotics.

MANY WOMEN VICTIMS OF HABIT ARE FOUND

Three Doctors Already
Charged With Violating
New U. S. Law Which Regulates
Sale of Narcotics.

A rigid investigation by secret service of the government under the personal supervision of Dr. George D. Case, federal drug inspector, has resulted in cases against two other physicians, including Dr. W. A. Starnes, proprietor of a sanitarium on Woodward avenue, Dr. C. J. Bible, the first man arrested since the enforcement of the new statute, was indicted some time ago by the federal grand jury.

Dr. Cooke is under bond of \$100 to answer the call of Judge Colquitt. His preliminary hearing has already been held, but judgment was suspended. The case against Dr. Starnes will be held as soon as he is able to leave his home, being confined to bed with illness. A patient of Dr. Starnes, however, has appeared before Judge Colquitt to testify to his addiction to morphine.

Horace Alexander, federal district attorney, says that the action taken against the three practitioners is a prelude to a series of warrants to be issued against some of the most prominent physicians in the city.

For a number of months, secret service men under Dr. Case have been investigating drug stores and doctors, going through prescriptions and taking notes of all prescriptions for drugs and narcotics, and taking notes of all Harrison statute. The action taken against Dr. Cooke was based upon a report that he was supplying morphine to patients, each of whom is a reputable citizen, and that he was supplying morphine to a family that has employed Dr. Cooke for years.

In Clutch of Drug.
Three of the quartet of patients were women. The fourth, a business man, was a patient of Dr. Cooke. The commissioner before Judge Colquitt was told that the patients were in private last week. They candidly testified that they were morphine addicts and were working for a cure.

The prescriptions were furnished. It was stated, as preliminaries to treatment for the cure of the habit which they were working for, that Dr. Cooke testified that if he had committed any violation of the national Harrison law, he would not be prosecuted. He stated that he was not a physician, but a patient, and that he was not a patient of Dr. Cooke.

The court which will investigate the situation is composed of Captain E. Russell, former judge advocate general of the navy, Captain A. T. Long, commander of the navy, and Lieutenant Commander W. C. Watt, who will act as judge advocate.

The seven midshipmen whose cases were turned over to the court have already been recommended for dismissal by the court. The court will also recommend for dismissal the case of the midshipman who was charged with the violation of the Harrison law.

The court will also recommend for dismissal the case of the midshipman who was charged with the violation of the Harrison law. The court will also recommend for dismissal the case of the midshipman who was charged with the violation of the Harrison law.

The Note in a Nutshell!

COBBLE INVADE MEXICO AND RESCUE BOYS

**Ten Americans Ride Across the
Border and Force Mexican
Colonel to Free Youth.**

Nogales, Ariz., June 5.—A posse of ten American cowboys and miners rode ten miles across the border into Sonora, Mexico, this afternoon, leveled their guns at the colonel commanding the garrison, while 150 soldiers looked on, and obtained the release of two American boys, kidnapped early today by three of the soldiers on the Arizona side of the border.

The colonel gave up his two 17-year-old prisoners, George Vaughn, son of a storekeeper at Duquesne, and Henry Chang, son of a Chinese-American citizen of Washington, Camp, Ariz., without demand, and the posse rode triumphantly back to the United States. Santa Cruz is garrisoned by forces of the Mexican army, the Villa governor of Sonora. Washington Camp, where the Mexicans captured the boys, and Duquesne are border settlements, 15 miles east of here.

What was expected to be gained by the kidnapping of the boys was not ascertained. Good for Road Building. The kidnapping, he said, the three Mexican soldiers, mounted, near the border driving the boys, who were on foot, ahead of them at the point of revolvers. The posse was expected to be gained by the kidnapping of the boys was not ascertained.

Army officers were notified, as was Sheriff W. R. McKnight, who promptly started out from here with a posse. The posse was expected to be gained by the kidnapping of the boys was not ascertained.

GREY DRIVE BEGINS RUSSIAN LINES TO CIRCLE LEMBERG

**Heavy Fighting Results
From the New Movement,
and Fortunes of the Struggle
Are Fluctuating.**

The attempted German offensive in the west seems to have failed, as Berlin admits today the loss of the Sauer valley. The Russian drive in the east is making progress from the southwest, while their right wing is held up on the lower Danube. The Russian drive in the east is making progress from the southwest, while their right wing is held up on the lower Danube.

**RUSSIANS CLAIM GAINS
BY COUNTER ASSAULTS**

Left Wing and Extreme
Right of Austro-Germans
Are Being Severely Hampered—Attempted German
Offensive in West Seems
to Have Failed.

London, June 5.—Heavy fighting still is in progress in Galicia, where the Austro-Germans are attempting an encircling movement against Lemberg, such as proved successful at Przemyel. In this the fortunes are fluctuating. On the front of the Vienna extreme right wing in eastern Galicia and Bukovina is being severely hampered by the Russians.

The attempted German offensive in the west seems to have failed, as Berlin admits today the loss of the Sauer valley. The Russian drive in the east is making progress from the southwest, while their right wing is held up on the lower Danube. May Not Be Despatched
Before Monday Night.**

Washington, June 5.—The note which President Wilson, with the approval of his cabinet, had prepared to be sent to Germany insisting on an armistice to the rules of maritime warfare was not called today. Word came from the white house in the forenoon that it has been virtually finished, but the document was not given to legal officials of the state department today as had been expected.

Reason for Delay Not Known.
The reason for the delay in the dispatch of the note was not revealed. Officials declined to say when it would be called or what its status was. It was said that the president had practically finished it but that it had not yet been given to legal officials of the state department on Monday for revision of legal details.

If the communication is not sent before Monday night it would scarcely reach Germany in time for presentation to the German government.

In some quarters the delay was thought to be due to the desire to give Meyer Bernstein, personal envoy of Count von Bernstorff, the German ambassador in Washington, an opportunity to reach Germany about the time the imperial government would be asked to accept the armistice. Officials declined, however, to admit that the delay was for this reason.

Previous reports that the note will be brief, but emphatic, are borne out, it is said, by the text as it now stands.

Lusitania Not Armed.
Sir Cecil Spring-Rice, British ambassador in Washington, has been assured by the British government solemnly assuring the United States that the Lusitania was not armed. This assurance conforms with the investigation conducted by the United States government.

Affidavits claiming that the Lusitania still is under investigation by the department of justice, but officials declared that the investigation was complete and that the ship was not armed.

Ambassador Gerard called today that reports of Americans in Germany having been taken to the Lusitania to leave were attributable to the Lusitania's standing advice that the war zone in Europe is not a favorable place for Americans.

Referring to the stories that the Lusitania had been taken to the Lusitania, he said that he had been told that the Lusitania was not armed, and that he had been told that the Lusitania was not armed.

Referring to the stories that the Lusitania had been taken to the Lusitania, he said that he had been told that the Lusitania was not armed, and that he had been told that the Lusitania was not armed.

Boy Sentenced to Pen In Hour After Robbing Girl Cashier of Bank

Kansas City, June 5.—An hour after he had held up Miss Martha Bell, 19 years old, cashier of the First National Bank, a boy named Donald E. Smith, 17, was sentenced to the penitentiary for a term of one year.

Smith was arrested by police officers who were on duty at the bank when the robbery took place. He was taken to the police station and held overnight. He was then taken to the penitentiary and sentenced to a term of one year.

A Testimonial

"Newspapers are unquestionably the standard form of advertising." says a president of one of the big tobacco companies.

Newspapers are good advertising mediums or this company would have found it out before it began investing thousands of thousands of dollars in their columns annually.

"A manufacturer or merchant who has a good product to sell will find it well to tell the truth about it in the daily newspaper. It is the only way to reach the people who have money to spend and spend it for dependable merchandise."

Constitution Advertising brings the highest percentage of results. It reaches the people who have money to spend and spend it for dependable merchandise.

MAYOR BRIDGES SMITH PLEASED BY REUNION

Macon Executive in Atlanta
on His Way Home from
Meeting in Richmond.

Mayor Bridges Smith, of Macon, was in Atlanta Saturday en route home, after attending the Confederate reunion in Richmond, Va. Mayor Smith is adjutant of the Georgia division of the United Confederate Veterans, and is proud of having been a confederate soldier.

"We had a great time at the reunion and the people of Richmond could not have shown us more genuine hospitality," said Mayor Smith. "The only thing to mar the pleasure of the affair was the rain, which poured continuously and caused several affairs to be called off."

"It made me feel proud of Georgia to see Governor-elect Nat E. Harris from Macon taking his place among the distinguished confederate veterans, and I loved my old state better when I thought that she had again honored one of her veterans by making him the chief executive."

Mayor Smith and a delegation of about 1000 Macon and Edgefield citizens are planning to come to Atlanta when Judge Harris is inaugurated. Arrangements are already being made for special trains for the occasion.

The recent announcement that a bill would be introduced in the next general assembly providing for mayors to succeed themselves indefinitely in the office of mayor proved of no little interest to Mayor Smith. He said he would make the race for re-election again this summer, but that under the law it would be the last time he could run for the office until after the lapse of two years. Mayor Smith, of Macon, and Mayor Woodward, of Atlanta, are the only two Georgia mayors the proposition would directly affect.

Mayor Smith said he understood he would have no opposition, but was not prepared to announce who would be the secret organization of more than 1,000 voters of Macon has been formed, it is said, to "put over" their candidate, but they have not made public the name of the candidate.

Rhodes Scholarship Exams Will Be Held In October This Year

Examinations for Rhodes scholarships at Oxford university, England, will be held in every state of the union in October of this year. These examinations are for three years, and are of a value of \$1,000 annually, which is a sum sufficient to meet the ordinary expenses of a college student at the university, including tuition, books, living expenses, clothes and the expenses of considerable, but not extensive, vacation traveling.

To be eligible a candidate must be between the ages of 19 and 25, unmarried, and must have completed at least the second year in college. The examinations which are not competitive, are of elementary, and include arithmetic, the elements either of algebra or geometry, Latin grammar, translation from Latin into English, Greek grammar, and translation from Greek into English.

However, experience having shown that sufficient Greek can be obtained in the interval between a candidate's receiving the appointment and coming into residence at Oxford to take the examination successfully, he may be some eligible for selection by passing the other subjects.

Having passed the preliminary examination the candidates present themselves before the committee of selection of their state, which makes the appointment on the basis of the candidate's previous scholarship record, his character, his qualities of leadership and his fitness for study and in outdoor sports.

WILKINSON TO ADDRESS DECATUR TRADE BOARD

One of the most interesting programs ever given by the Decatur board of trade will be the address of Tuesday afternoon at 2 o'clock, when President Mel R. Wilkinson, of the Atlanta Chamber of Commerce, will address the members and their friends. The luncheon will be held in the private dining room of the Atlanta Chamber of Commerce building.

Mr. Wilkinson's address will deal with the work of the Decatur board of trade and the plans for the big fair which will fall. It is probable that the Kaib county may use as its exhibit at the Southeastern fair the display of the DeKalb county one-day product pageant.

U. OF G. CLASS OF 1895 TO HOLD ANNUAL MEET

The class of 1895 of the University of Georgia will hold its twentieth annual reunion at Athens during commencement, the middle of this month. The call has been issued by Montague Carson, of Savannah, the president of the class. Among the members of this class in Atlanta are J. H. Porter, John Hill, E. R. Dougherty, Robert A. Riddle, Ralph D. Cochran, S. G. Hunter, Dr. Archibald Smith and W. L. Kemp, all of whom will attend.

With Neville we are holding at present more than half the northern section and all the eastern part, that is to say, more than two-thirds of the village.

We have likewise gained 450 meters in the northern part of the "labyrinth" of the work, where the struggle continues without cessation.

On the whole of the front of that sector the artillery engagement, notably at Lorette, at Neville and at the "labyrinth" has been one of extreme violence.

The German gun which last evening fired on Verdun was located this morning and came under our fire. We have been able to ascertain the effect of base and blew up an ammunition depot.

The communication issued in the afternoon follows:

The enemy delivered three violent counter attacks last night against the sugar refinery of Souches and the trenches north and south of that position; they were repulsed, and in their first effort particularly they suffered very heavy losses.

We remain masters of every one of the positions conquered by us.

Last night also we took possession of a German position northwest of the road in known as the Cabaret.

Notice of Increase in Guaranteed Mileage to 6,000 Miles

Hereafter 6,000 miles will be the basis of guaranteed service for all Pennsylvania Oilproof

VACUUM TIRES

per guarantee tag attached to each casing. This will apply also to all Vacuum Cup Tires at present in service. This announcement follows logically the result of The Automobile Club of America Official Test, in which nine tires on heavy cars averaged 6,760 miles, three of them exceeding 8,900 miles.

On the new basis of guarantee, Vacuum Cup Tires are lower in cost per mile by from 17% to 22% than any so-called non-skid tires sold on a 3,500 miles adjustment basis.

Bear in mind also that Vacuum Cup Tires are the only tires guaranteed not to skid on slippery pavements, or returnable at full purchase price after reasonable trial.

The Vacuum Cups act on the only principle by which rubber projections can grip a smooth wet surface.

ing. The enemy obstinately attacked back at several points, but was driven back to the river.

TEUTONS AIM AT RUSS PLANK.

Petrograd, June 5.—(Via London.)—Further discussion of the evacuation of Przemysl brought out the claim in Petrograd today that the Germans doubled their forces operating on their southeastern front from the Galician to the Russian front. The reinforcements are being directed toward Przemysl, left flank in the Dniester region, this having become since the abandonment of Przemysl the chief point of the Austro-German attack.

The movement of the German counter would appear to have been stopped miles east of Przemysl, and the elimination of the irregularities of the Russian alignment has, according to Russian military, advantageously shortened their front from 15 to 13 miles. The front line from Dussauk to Volhava previously received its length and irregularity because of the necessity of including the ring of the Przemysl. Now it is a straight line between the two points and not more than 15 miles long.

With this center of the Galician operations making time, the Russians are described here as being forced back on their extreme left near the lower reaches of a slow pivoting movement, toward fortifications on their right. This gives the situation as a whole the character of a slow pivoting movement, with Przemysl as the center.

TEUTONS PRESS AGAINST RUSSIANS.

Berlin, June 5.—(Via London.)—Reports from the Galician front indicate that the Austro-German troops now are in complete possession of all parts of Przemysl. The Russians contested stubbornly each advance, but at least were driven from the eastern and northwestern parts, but failed to fall.

It generally is admitted that the greater part of the Russian army was able to retreat eastward by defending the positions toward the south. This checked the attacking army of General von Boehm-Ermolli and temporarily prevented the complete encircling of the city. Although the railroad line along which the retreat occurred was under the fire of field guns, they were too far away to be effective. Apparently the city suffered little during the Russian occupation. Stores of provisions and a considerable amount of military material were captured immediately after occupation of Przemysl. General von Boehm-Ermolli, who succeeded, however, in joining the rearward along a continuous front moving eastward. The only serious opposition which is expected probably will be offered near Brodka lake, south of Lemberg, where the Russians may be able to throw in reserves. It is expected the German General Linington, moving northward from Stry, will be able to threaten the Russians from the rear if they offer such resistance.

GERMAN FLEET IN BAL TIC.

Petrograd, June 5.—(Via London.)—A strong German fleet has appeared in the middle Baltic and exchanged shots with the Russian fleet near the Gulf of Riga.

ANOTHER GERMAN SPY ARRESTED IN ENGLAND

London, June 5.—Official announcement was made here this afternoon that another German spy, named Robert Rosenhath, had been arrested and had confessed.

According to the official statement, Rosenhath confessed he had been sent to England by the German admiralty to obtain information on the movements of the German fleet and to relay this information to the German navy.

Little Damage Done.

The Star says: "As on the last occasion of a Zeppelin raid, the newspapers have been forbidden to publish any details of places visited or damage done. The natural result has been the spreading of many rumors, which we are glad to say, are mainly unfounded."

"The safety of the country is the supreme consideration, and it is required by the authorities as necessary that no hint shall be given of the localities reached by the raiders or the amount of damage they did."

"It is very satisfactory to report that there was not the shadow of a panic in London this morning. Millions of Londoners never heard of the visit. If panic is the object of the raid, it has once more failed completely."

Six killed Monday's Raid. Official announcement was made tonight that six persons were killed in Monday's Zeppelin raid over London. An official statement Tuesday gave the number of deaths as four. Today's statement follows:

"It is now possible to state definitely the number of fatalities caused by the hostile aircraft which visited the neighborhood of London on May 31. The number is six—one man, one woman and four children."

"This number does not include the case of an elderly woman whose death was attributed to shock caused by the raid."

AMERICANS IN LONDON ARE GIVEN WARNING.

London, June 5.—Several residents of London today informed American Consul General Skidmore they had received anonymous telephone calls last night warning them to get out of London with their families at once.

And then the voice was M. K. Shaler, a member of the American Relief Corps, who said he had received an unknown voice over the telephone last night, and furthermore, to fill the house with gas.

For several days reports have been in circulation in London that all Americans were to be warned to leave England by June 5. According to this report the American embassy was being requested by Berlin to issue a warning of this nature.

The investigation brought the information that the ambassador had received no such request.

GERMAN BOMBS DROPPED ON CALAIS.

Paris, June 5.—A Havas dispatch from Calais states that a Taube aeroplane flew over the city today and dropped several bombs. One person was killed. Property damage was

RADS CONTINUE TO BRING PEACE

German Undersea Boats Very Successful Against Fishing Craft Which Are Supposed to Be Immune.

London, June 5.—Although Mr. Churchill, the former first lord of the admiralty, announced today that the submarine menace has been fixed with a total of thirteen hundred, measuring three hundred tons and over, which arrived at or departed from the British Isles, the German undersea boats have been very successful in the last few days.

Reports from the border that the British navy is not yet strong enough since Wednesday the Germans have sunk five steamers, three of which were British and two Swedish, twelve British trawlers and two sailing vessels.

The German total for the week ending Wednesday was eight British vessels out of a total of thirteen hundred, measuring three hundred tons and over, which arrived at or departed from the British Isles.

The largest ship sunk was the Cairn, a Liverpool steamer, 1,000 tons. Another important victim was the Cairn, a Liverpool steamer, 1,000 tons.

Kirkwall, Orkney Islands, June 5.—Three more British ships have been sunk by German submarines. The steam fishing vessels Kathleen, of Peterhead, and Evening Star, of Aberdeen, were sent to the bottom yesterday. The crews were landed here today.

Norwich, England, June 5.—The trawler Little Boy, of Lowestoft, has arrived at this port with the crews of the trawlers Horace and Economy by German.

A German submarine stopped the trawler in the North sea Thursday and gave the crews of the Horace and Economy 15 minutes to board the Little Boy. After the transfer had been made the fishermen were sunk by bombs.

London, June 5.—The steam drifter Ena May, of Peterhead; the trawler Strathbran and the sailing ship George and Mary all have been sent to the bottom by German submarines. The crews of all three were saved.

Leith, Scotland, June 5.—The steamer Sanket, of London, was sunk yesterday. The crew was ordered into the boats and landed at Leith.

London, June 5.—The trawler Ender was sunk in the North sea yesterday by shell fire from a German submarine after the crew had taken to the boats. The crew were landed safely.

FRENCH STEAMER SENT TO BOTTOM.

London, June 5.—Havas dispatch from Brest says the crew of the French steamer La France, which was torpedoed by a German submarine yesterday, were sent to the bottom.

When fifty miles off Ouessant, about 100 miles from Brest, the steamer was directly for the Penfold, which was the smallest, and first of the vessels, which fell astern or went overhead. We signaled three times, but they were not answered.

Finally the submarine ceased firing and allowed the vessels to return to the boats. These were some distance from the Penfold when the torpedo was fired which sank the steamer in three minutes.

After thirty hours exposure the crew was landed last night.

FOREIGNERS READY TO QUIT MEXICO CITY.

Veracruz, Mex., June 5.—There now are 10,000 foreigners ready to leave Mexico City, according to information from the British consul, British consul general Shanks, who left Veracruz today to visit the refugees at the American side of the border.

Officials here say it is imperative that the United States send a transport to Veracruz to receive the refugees, and that the transport reach there by June 5. Veracruz already is overcrowded, and it is feared that the attempt were made to care for the refugees from Mexico City the result would be sickness and widespread suffering.

FOREIGNERS READY TO QUIT MEXICO CITY. Veracruz, Mex., June 5.—There now are 10,000 foreigners ready to leave Mexico City, according to information from the British consul, British consul general Shanks, who left Veracruz today to visit the refugees at the American side of the border.

Officials here say it is imperative that the United States send a transport to Veracruz to receive the refugees, and that the transport reach there by June 5. Veracruz already is overcrowded, and it is feared that the attempt were made to care for the refugees from Mexico City the result would be sickness and widespread suffering.

FOREIGNERS READY TO QUIT MEXICO CITY. Veracruz, Mex., June 5.—There now are 10,000 foreigners ready to leave Mexico City, according to information from the British consul, British consul general Shanks, who left Veracruz today to visit the refugees at the American side of the border.

WILSON'S POLICY BRING PEACE

Evidences of Desire on Part of Villa-Zapata Faction to Agree With Carranza-Carranza May Refuse.

Washington, June 5.—The effect of President Wilson's warning to the factions in Mexico still is unknown to the United States government. One of the chief has made reply. Evidence of a desire on the part of the Villa-Zapata faction to discuss the Carranza-Zapata pact is taken as an indication that the Carranza-Zapata pact is not yet a final settlement, but that the Anglo-French troops are fighting for positions which will give them command of the Dardanelles.

These operations have been necessary after landing the first ally forces had to be supplied with necessary artillery and munitions to enable them to attack the Turks who occupied very strong positions and have been delivered by the British and French lines.

Nothing official has been received from either side for several days, but the British and French lines have been repulsed all the attacks, the British and French lines have been repulsed all the attacks, the British and French lines have been repulsed all the attacks.

A successful ending to these operations would be joyfully received here.

THINGS ARE MOVING AT DARDANELLES

Allies Have Begun General Offensive, and It Is Believed That the Forcing of the Straits Is at Hand.

London, June 5.—A dispatch from Smyrna that a combined general offensive against the Turkish positions began yesterday and Winston Spencer Churchill's statement at Dundee that the allied forces are within a few miles of victory, is taken as an indication that the Carranza-Zapata pact is not yet a final settlement, but that the Anglo-French troops are fighting for positions which will give them command of the Dardanelles.

These operations have been necessary after landing the first ally forces had to be supplied with necessary artillery and munitions to enable them to attack the Turks who occupied very strong positions and have been delivered by the British and French lines.

Planning to Revive Interest In East Lake Water Features

The lake committee of the East Lake Country club is preparing to improve this beautiful 34-acre lake to such an extent that it will once more assume its former place among East Lake attractions, and become the most popular feature of the country club. The committee is composed of Jas.

Burton and Howard Goldert.

An experienced life guard, an officer of the United States life saving corps, Lieutenant Charles E. Quinn, has been employed for the safety of the bathers and instruction of swimmers. He is stationed on duty at East Lake from 10 o'clock each morning until night-fall.

The committee is trying to revive interest in the water features that once were so popular at the country club, and announce that plans are under preparation for a series of water events through the entire season. These events will include swimming, canoe and boat races and other water sports, and possibly an illuminated canoe parade in August or September, just before the close of the lake season.

A raft has recently been built for bathers in full view of the veranda of the beautiful new clubhouse, and the old raft has been repaired. A measured swimming course has been laid out for good swimmers, and the beach has been sand and cleaned up for the children.

The row boats owned by the club have been repaired and are now in excellent shape. New oars have been purchased and a boatkeeper put in charge. Canoe racks have been repaired also.

All Germs Ordered To Beat It—Gitt!

Searching Influence of a Remedy That Works Wonders.

The introduction of S. S. S. is at once a command to blood impurities to find a way out.

And what are blood impurities? They may be the hypersecretions found in the mucous linings of the body; they may be acid accumulations known as rheumatism; they may be boils, pimples, eczema, acne and stubborn, indolent sores. But examined closely, they are all germs that have gotten the upper hand and it requires the flushing influence of S. S. S. to drive them out. And out they go when S. S. S. begins to circulate in the blood. It only requires five minutes to begin this influence, for it is a fact that in this limited time S. S. S. may be traced in the urine. In the perspiration, in the effluence from the lungs to show that it is at work. Germs, mind you, are of various kinds, but all are foreign to health and S. S. S. is no respecter of destructive germs. It drives them all out of whatever name they go by. Just get a bottle of S. S. S. or any druggist and soon you will observe a decided change. And if yours is a stubborn case, write to the Medical Adviser, care of The Swift Specific Co., 107 Swift Bldg., Atlanta, Ga. He is a regular physician, proud of his name by virtue of his distinguished family and is recognized as a foremost physician on his own merit.

HENDLEY SPEAKS TO MASS MEETING ON TRIAL BY JURY

In answer to handbills that were scattered downtown Friday and Saturday, a large crowd gathered on the scattered grounds in the misty rain last night "in defense of trial by jury."

An address denouncing the invasion of outside influences in court cases, such as the Frank case, was made by Rev. A. C. Hendley, pastor of the Capitol View Baptist church. He urged that the law be allowed to take its course in the Frank case, and that no commutation be given the convicted man.

He was greeted throughout his speech by tumultuous cheers which, no doubt, reached the ears of the prison, as the jail is less than two blocks distant. Loud acclamation, however, was the only demonstrative expression of the gathering, and the speaker, himself, pronounced it "the most orderly he had ever addressed."

The meeting, according to the handbills, was set for 8 o'clock. The crowd had grown to large proportions by 8:30, but no speaker or president was in evidence.

THREE ADDRESSES IN ATLANTA TODAY BY PRISON WORKER

The prisoners at the Atlanta federal prison will be addressed at 8:30 o'clock this morning by Major Thomas Cowan, national secretary, in charge of prison work for the Salvation Army, who arrived in the city yesterday from New York.

He will make two other addresses during the day, both of which will be open to the general public, speaking at 9:30 a. m. in the hall, at 37 Marietta street, and at the regular Salvation Army service at 5 p. m. in the hall, at 37 Marietta street.

The Salvation Army's prison work in Atlanta is in charge of Major William French, and has been notably successful during the past year. The Brighter Day league, composed of prisoners, has a large organization in the federal prison here. Major Cowan, who was the guest of Brigadier A. W. Crawford, division head of the Salvation Army.

Grays to Celebrate Twentieth Anniversary of Reorganization

The Atlanta Grays, company K, Fifth regiment, will celebrate the twentieth anniversary of their reorganization on June 10 at the Ansley hotel, at 7:30 o'clock.

This gathering is also to be a homecoming of all former living members of this gallant organization, dating from its beginning in 1895, and its reorganization shortly after the war, to the present time. Its existence has practically been continuous, and it was one of two Atlanta companies that did valiant service in the confederate cause, the other being the Gate City Guard.

The program follows: Invocation—Rev. Fritz Hausenberg. "The Grays in the Civil War"—Captain Letts and George Hannon. "The Grays During Reconstruction and the Building of the Fifth Regiment"—Lieutenant Colonel W. L. Hayward.

"Colonel of Two Regiments at Once"—Colonel John S. Candier. "The Birth of Company K"—Captain William J. Kendrick, U. S. A.; late major Fifth Georgia.

"The Christening of Company K" by the State of Georgia—General William D. O'Neal.

"All's Present That's Accounted For"—Charles M. Pendleton, late lieutenant U. S. A.; captain Philippine constabulary and first sergeant of company K. "The Union Soldier"—Lucien Lamar Knight.

"The Atlanta Grays as I knew Them"—captain William C. Moore, Major S. Dorsey, S. H. Howell, E. E. Pomeroy, William Smith, Claude C. Smith, Charles A. "Till We Meet Again"—The teamster, Hendrickson—Rev. Fritz Hausenberg.

AUGUSTA TO ASK BIDS ON MUNICIPAL WHARF

Augusta, Ga., June 5.—(Special.)—Plans for the new municipal wharf, to cost in the neighborhood of \$50,000, have been completed, and bids will be advertised for in a few days. The new wharf will be of concrete, modern and up-to-date in every particular. The large line has been doing a good business, but has been greatly handicapped by the poor wharfage facilities. A new electric crane is now being installed and will be ready early next week.

GLENNER SECRETARY OF EASTMAN CHAMBER

Augusta, Ga., June 5.—(Special.)—W. L. Glenn, of this city, has been offered the position of secretary to the chamber of commerce at Eastman, Ga., and has accepted. Mr. Glenn is well known throughout the state as an industrial agent, having been connected with the Georgia and Florida, the Central of Georgia and other lines for many years.

FIRST COTTON BLOOM EXHIBITED IN TIFT

Tifton, Ga., June 5.—(Special.)—The first cotton bloom reported for Tift county this season was on exhibition in Tifton yesterday. There were two of the blooms and they were from the farm of Mr. J. B. Cook, near Chula, in the northern section of Tift. Mr. Cook has three hundred acres of cotton and it is all from two and one-half to three feet high.

BOND ISSUE PLANNED IN CHARLTON COUNTY

Waycross, Ga., June 5.—Charlton county people are now discussing a bond issue for good roads and schools. It has been proposed that bonds in the sum of \$100,000 be issued, the election to be held on some condition seems to be more settled. Reports received here indicate that there is healthy sentiment in Charlton for improving the roads and schools under a bond issue.

TAKES THE PLACE OF DANGEROUS CALOMEL

New Discovery! Dodson's Liver Tone Acts Like Calomel But Doesn't Gripe, Salivate or Make You Sick—Don't Lose a Day's Work—Harmless Liver Medicine for Men, Women, Children—Read Guarantee!

Ugh! Calomel makes you sick. It's horrible! Take a dose of the dangerous drug tonight and tomorrow you may lose a day's work.

Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel, when it comes into contact with sour bile crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just try a spoonful of harmless Dodson's Liver Tone tonight.

Here's my guarantee—Go to any drug store and get a 50-cent bottle of Dodson's Liver Tone. Take a spoonful and if it

doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not salivate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

WHO'S WHO IN THE CANDLER BUILDING

Removal Notice

We desire to announce to our friends and patrons that we are no longer located in the Walton building, but are now occupying

Nos. 1302-1307 Candler Building

Ashcraft-Wilkinson Co.

Desirable Offices

Single and En Suite

Some of these are equipped with compressed air and dental waste; hot and cold water in all offices; all-night elevator service; location best in the city, and service unexcelled.

BOOK REVIEWS IN TABLOID

The Brockbank Hilde is a weird story by a very popular author and it cannot be said that his mystery stories have the commonplace flavor for he tells in a most interesting way the remarkable experience of Mr. Lovell Brockbank, the friend and partner of Mr. Brockbank.

Mr. Brockbank, who was a prominent London citizen and a successful grain dealer, accompanied by his wife and his partner, Reede, decided one summer that they would take their vacation at the same time, among other places going to Switzerland and then they attempted the climb of Mont Blanc, but before they reached the summit, Brockbank collapsed and rose on the mountain side. His wife and his partner took his body to Geneva where it was cremated in accordance with his will-known wish. The returned to London with the ashes. It is then that things began to happen. When Reede went to the office the day after his active he had a letter from Brockbank himself. It is a terrible shock to him and Mrs. Brockbank. And Brockbank himself. If you like well-written mystery stories read the explanation of the middle.

Mr. Wales is an Englishman, 41 years old. He was educated at Harrow school where he immediately preceded the famous Winston Churchill. For several years he practiced law in Hull and was the winning competitor in the magazine which finally began declining his offer. His first novel, "Mr. and Mrs. Wales," has been translated into many languages. (The Century Company, New York City.)

many of our customs, upon an ancient foundation. Mother-worship, the Christian religion. Mother-worship reaches back into pagan times. The earliest records to be found of the Mother's day are in the stories of the Old Testament. The festival of the Mother of the Lord, which is the celebration of the birth of Christ, is the oldest festival of the Mother of the Lord. The festival of the Mother of the Lord, which is the celebration of the birth of Christ, is the oldest festival of the Mother of the Lord. The festival of the Mother of the Lord, which is the celebration of the birth of Christ, is the oldest festival of the Mother of the Lord.

NOTHING.
As years ago we carried to your knees the tales and treasures of eventful days. Knowing I feel too humble for your praise, I have not written to you. Still we bring, with other smiles and tears, what gifts we may, to claim the old, dear right.

WASHINGTON IS HEAD OF SOUTHERN OIL MEN
J. W. Washington, of Belton, S. C., is now president of the Southern Oil Men's association. He held the position of vice president.

Nathan Hale. True stories of Great Americans. By Jean Christie Hale. The author says in the preface to the story we present of Nathan Hale is that of the brave and noble patriot who died for his country. The story is a true one, and it is a story of a man who died for his country.

Getting a Wrong Start. (Anonymous). The author, who is a well-known American writer, so it is said, takes this method of telling the story of his own eventful life. It is a real tale recounting the adventures of a young man, who at an early stage, is thrown on his own resources.

The Business Adventures of Billy Thomas. By Elmer E. Ferris. An interesting account of an up-and-coming writer.

A Far Country. By Winston Churchill. The story is taken from the Bible, a quotation concerning the prodigal son, and it is a story of a man who goes to a far country and returns.

The Harber. By Ernest Poole. The author has written a very interesting story of the revolt of his little brother, who does not want to begin at the bottom but wants to be something big.

HEARST'S INTERNATIONAL LIBRARY. The following books have just been issued to the public, having made their introduction through the moving picture industry. The books are: "The Harber," by Ernest Poole; "The Harber," by Ernest Poole; "The Harber," by Ernest Poole.

MOFFAT, YARD & CO.
Moffat's Day is his history, origin, related in prose and verse. Compiled by Moffat, Yard & Co. Edited by Haven Schaffner.

IN THE THEATERS
The first official steps toward establishing a municipal farm or similar institution for "dope" addicts and users of habit-forming drugs was taken last week of the city charter revision committee of general council adopted the suggestion of Attorney Jack J. Spaulding to secure the charter amendment to secure by charter amendment power to establish the institution, with the view to investigate the matter, with a view to having the county officials with them in making the proposed home suffice for both city and county patients.

On Visit to Atlanta

Photo by Hatcher.
MRS. T. H. HENENAGE.
Of Chicago, who is the charming guest of Miss Bessie Jones. Mrs. Henenage was Miss Florence Cribben.

Gov. and Mrs. Slaton Entertain
Staff and Distinguished Guests

Governor and Mrs. John Marshall Slaton will give a dinner and ball at the Piedmont Driving club the evening of Tuesday, June 8, in compliment to the members of the governor's staff and their wives.

Invited to meet them will be two hundred guests, these to include Governor-elect and Mrs. Harris, ex-Governor Brown and Mrs. Brown, the state house officials, the judges of the supreme court, representatives of the United States army and navy in the city and a number of the personal friends and Mrs. Slaton.

The dinner will be served in the ballroom, where the decorations will be in red, white and blue. The national insignia and the Georgia flag will combine with woodland smilax and crimson flowers in the general scheme, and there will be an orchestra to present brilliant music.

The event concludes a series of beautiful entertainments which have marked the regime of Governor Slaton and to which Mrs. Slaton has so generously given of her charming self, as well as of the hospitality of her home and the mansion.

For Miss Shadburn.
A bright occasion for the college set was the dancing party last evening given by Miss Irene King at her home in Druid Hills for her visitor, Miss Celeste Shadburn, of Buford, Ga. Quantities of yellow cornucopias, yellow lilies and sunflowers decorated the apartments, which were thrown together for the dancing.

Miss King was a charming young hostess, wearing a gown of white lace over yellow taffeta, and Miss Shadburn wore white taffeta and lace. Fifty guests enjoyed the evening.

Cowell-Stevens.
A pretty wedding of Wednesday evening was that of Miss Emma Cowell to Mr. Leonard Stevens at the First Christian church, Dr. L. O. Bricker officiating.

The bride was lovely in her wedding gown of duchess satin, trimmed in shadow lace, with train of brocade satin. Her tulle veil was arranged in cap effect and framed in orange blossoms. Her flowers were bride roses, showered with valley lilies, she entered with her maid of honor, Miss Adeline Donaldson, who wore embroidered orange over yellow taffeta, and carried yellow roses.

The attendants were Mrs. Helen Madison, of Fitzgerald, Ga.; Mrs. A. G.

Langley, Miss Panny Perrin, Miss Mary Bayment, Miss Ada Hole and Miss Ethel Millican. They wore becoming gowns of white orandine trimmed in Valenciennes lace, and carried baskets of yellow Shasta daisies tied with yellow tulle. Mr. A. G. Langley was Mr. Stevens' best man.

A reception was held at the home of Mr. and Mrs. Oscar N. Cowell, in West End. Mrs. Cowell wore black tulle and lace. She was assisted in entertaining by Mrs. Jesse Donaldson, the bride's sister, who was gowned in blue crepe de chine and lace.

Mr. and Mrs. Stevens left immediately after the reception for Chattanooga, and upon their return will be at home to their friends at 494 Piedmont avenue, Atlanta.

Psychological Society.
The Atlanta Psychological society meets Sunday afternoon at 1:45 o'clock in the convention hall of the Ansley hotel. The subject is "Demand and Supply." There will be several short talks on this subject. Madames Neely and Martin will play piano duets. Miss Fanny Bell Woodruff will give a reading. There will be questions and answers on psychological problems. These meetings are interesting and instructive. All interested are invited to attend.

J. P. ALLEN & CO.

Mid-Summer Tub Ready-to-Wear,
Summer Silk Frocks and Sport Wear

These have been weeks of planning and employment of our heavy purchasing power and creative work, and we are able to offer a number of unusual June values—some described and pictured below.

New With the Season

The Vogue for

Summer Frocks of Silk
\$16.75 up

Here are hundreds of beautiful silk frocks, blue, Copenhagen and black—the dress of distinction for midsummer wear—

The vogue for silk provides a frock possessing all the shimmering beauty and smartness of silk, and yet quite as cool for warm weather as cotton. It's the dress that is ever ready—flounced and pleated models in attractive variety. Five, from many styles, are illustrated. There are models appropriate for morning wear, afternoon promenades and summer evening social events.

Summer-y and Cool Looking—These

Delightful Frocks of Fine Net,
Special at \$16.50. Regular \$22.50 Values

Our unusual buying facilities are emphatically demonstrated by the three graceful Frocks of net illustrated. From a large group of such Frocks nearly every woman is likely to find a model suited to her individual needs and preferences.

The Frock Sketched at the Center—

Embroidered with daisy motifs and finished with tab-like edges, this pretty Frock is made over a net slip and girdled with white velvet.

With a Greek Key Border in Color—

This Frock sketched at the right is deeply girdled with colored taffeta and mounted over ecru net.

With Quaint Round Neck—Ribbon-Trimmed—

The Frock sketched at the left offers a delightful style, with cord shirrings, embroidery and lace for ornamentation.

Styles Not Usually Found at This Price—
A Thousand Voile Blouses
at \$2 Each

Smart enough for a down-town luncheon, inexpensive enough to serve for general summer wear—the four Blouses sketched indicate, in a measure, the truly unusual values found in this event.

Most women will appreciate the wisdom of choosing a summer supply of Blouses here today.

Pin stripes arranged in clusters, as shown by the model sketched at the left, or broad blazer stripes, are favored on sheer voiles and linen.

Filet pattern laces trim embroidered voile Blouses; white linen collars and cuffs are used effectively—as shown in the model sketched at the right.

While many models reveal the return to elbow sleeves, for summer comfort.

These Days of Out-Door Recreation Demand

Tub Skirts

In Great Variety

The Women's Skirt Section has broad and well-chosen assortments of washable Skirts—many of which are priced specially for early June selling.

Golfine Skirts—

Exceptional Value at \$3.95

White Skirts at \$2.00

One of pique, with satchel-like pockets, and another style of cordeline are sketched. Many other styles at this price.

To Our Knowledge—Such Values Have Never Before Been Offered—

Smart Milanese Silk Coats Decidedly
Exceptional Values at \$11.50 & \$16.50

Women who keep in close touch with fashion know of the extreme favor now accorded the Milanese silk coat. They are seen at smart country club gatherings, at summer resorts and serve admirably for all summer day wear.

These are of a quality which would cost very much more had we not obtained from a manufacturer a special price for an order which would keep his factory busy.

Three are illustrated—showing the smart, loose lines, commodious pockets, and soft belts of these styles. Plain colors, blazer stripes and combinations of colors are offered. All sizes, 34 to 46, assured prompt shoppers.

These Have Just Arrived—Many New Models
in Black Taffeta Skirts

Triple tiers and accordion pleated flounces, scalloped and plain circular flounces, straight pleats on yokes. Ever so many extremely attractive new silk skirts—

\$5.95 to \$15.00

J. P. ALLEN & CO. 51-53 Whitehall St.

W. F. WOODLIFF

Some Entrants in Southern Golf Championship Here

It is hoped by the committee that every tennis player in the city will enter this tourney. Not only the men players are wanted, but the boys who play on the courts also. It is the wish of the committee to hold a tourney exclusively for boys, and if enough can be induced to enter, this will be done.

Entries will be received from now on at 119 Peachtree.

SCIENCE AND NEAR-SCIENCE UP-TO-DATE

The Reason You Cannot Avoid Laughing

How Most Dignified Personality Is Shown to Have a Secret Sympathy for the Indecorous, Trivial and Foolish Word or Act

Why do we laugh?
 Why do those who are grave, dignified, respectable, religious, laugh at the clever portrayal of characters quite the opposite?
 Is it because a part of our personality is in sympathy with the indecorum, triviality, vulgarity of what we see? Are we not as honest at the vaudeville as at church—if we attend both? Even more honest?

Sylvia H. Billas differs from others who have theorized as to the cause of the laugh. And her views, as expressed recently in the American Journal of Psychology, have set a host of scientists to thinking.

The reason for the merry chuckle has always been shrouded in mystery.

Greatest Thinkers Are Baffled.

The greatest of thinkers, from Aristotle down, have tackled this great problem, which has a knack of baffling every effort, of slipping away and escaping only to bob up again, a pertinent challenge flung at philosophic speculation.

So says Henri Bergson. And Sylvia H. Billas quite agrees. Nevertheless, she advances her own theories.

Says this psychologist:

"Science has demolished the idea of a 'funny bone,' finds in the brain no special center for an appreciation of the humorous, and in the world of thought and action nothing inherently, intrinsically comic.

The first laugh whose strange source broke the long, silent gravity of the pre-human ages—what emotion gave rise to it? Was that primal man in any modern sense amused? He laughed at no sally of wit; his brain was tickled by no subtle and devious perception of the comic. Of this we may be certain.

"Summoning to our aid the evidence which biology and psychology afford, and guided by the imagination excited by scientific training to a species of insight, we will penetrate to that far away epoch when mirth was born to earth.

"What was the first emotion, and what its cause?"

"Laughter is the result of suddenly released repression, the physical sign of subconscious satisfaction. Our primitive man saw, it may be, another do the thing reproached by the tribe and his own nascent

conscience. The sight relieved the tension occasioned by his own repressed wish to do the selfsame thing—and he laughed.

"It is probable that the track for that particular discharge of nervous energy was laid down long before actual laughter took place. Darwin noted that the lower jaws of some species of baboons quivered up and down when they were much pleased. Expectancy, anticipation, satisfaction, with their accompanying bodily reactions, paved the way for laughter.

"We may bow our head during public prayer because it is the custom; we laugh at a joke because we must. This view finds confirmation when we consider what occurs during a struggle to suppress laughter. Our surface sense of propriety strives to suppress the evidence of subconscious approval.

"The secret of laughter is in the return to nature. Civilization and culture are late additions and we are living to a great extent in artificial conditions. Psychology makes plain the fact that our present mental equipment has been slowly and painfully acquired and a certain strain in maintaining that high altitude is inevitable. This tension is relieved by nonsense and by the portrayal in humorous anecdotes and on the stage of violations of convention and infractions of the prevailing code of morals and manners.

Laughter Must Be Honest.

"Laughter is honest and responds to the primitive honesty of others. We laugh at a sneeze which hinders a speech at its most pathetic passage because pathos in oratory is always somewhat strained—even artificial—while the sneeze is absolutely natural and honest."

Some scientists tell us that the expression of laughter is not always indicative of a psychological appreciation of enjoyment, for it is well known that idiots are prone to laughter which is often without any such significance. They often show a laughing countenance, the smile being more or less stamped on their features; or they may grin, giggle or chuckle at the slightest thing. It is probable that in such cases laughter purely expresses physical contentment, rarely associated with higher or more complex ideas.

When one is laughing the movements of

the chest and the larynx are almost exactly opposite to those that accompany the utterances of agony when one is distressed. In joy the expirations are usually short and the inspirations long, where as in distress the expirations are prolonged and continuous.

"In all races of men," says Darwin, "the expression of good spirits seems to be the same, and it is easily recognized." And he adds that "from the natives of New Zealand to the highly civilized Caucasian much the same forms of emotional expression are to be observed."

Maudsley describes what he terms a "quasi-pathological laugh," the abortive and incoherent laugh of the person of insane temperament, which is laughter pulled up abruptly, followed by a sudden facial seriousness, or a change which affects only

a part of the features, while the rest are unmoved.

Why did Democritus of Miletus, the "laughing philosopher," chuckle at the follies of men?

Mother Goose tells us that Old King Cole was a merry old soul. Therefore, we presume he had the laughing habit. It would be interesting to know what made him chuckle all over when he called for his pipe, and called for his bowl, and called for his soldiers three.

Does psychology contain an answer for this?

Use Terrific Force in Gun Making

STEEL for gunmaking is made in an open hearth furnace from which ingots weighing up to seventy tons can readily be cast. Then comes the forging of the ingot. For small guns the ingot is forged solid, but for six-inch and larger the ingot is forged hollow. The steam hammers which do the work can give blows equal to 700 tons.

Tests begin. Small pieces of the steel are cut off, hardened in oil and pulled asunder in the jaws of a hydraulic press. The strain runs up to forty-six tons per square inch.

If the tests are satisfactory the ingot goes on to the lathe to be "rough bored" inside and "rough turned" outside.

Then the barrels are hardened by being heated in oil at a temperature of 1,500 degrees Fahrenheit. For this purpose rapeseed oil is used. The cooling must be

very slow, and this is managed by burying the barrels in sand.

Then comes the final boring, which leaves the barrels smooth inside and out, and adds a fresh heating and cooling. This is called "annealing," and is most necessary to preserve the toughness of the steel.

Now the heart of the gun is ready and it goes elsewhere to be built up to the required strength by adding successive layers of steel hoops. These are put on hot and when they cool shrink into place.

Our big naval guns are all "wire-wound." The barrel revolves on a lathe while steel tape a quarter-inch wide and one-eighth thick is wound on at a tension of something like forty tons. This process gives the guns enormous strength and entirely does away with any possibility of an accident due to any flaw there might be in the body of the gun.

You May Not Know—

AUSTRALIA has prohibited the importation of imitation brands.

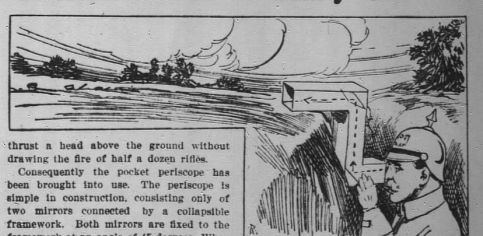

EXTRA leaves of a Pennsylvania inventor's extension table are carried beneath the top and raised into place for use by turning a pair of thumb screws.

UNDER a new government decree Danish mills must extract 64 per cent of the contents of the grain when handling rye and 68 per cent when handling wheat.

Small Periscopes as Life Savers to Many Soldiers

PROBABLY no instrument invented during the present European war has been the means of saving as many lives as has a small periscope now in use by the English soldiers.

With the growth of the trench mode of fighting the skill of the sharpshooters, especially at short range, has increased to an alarming extent. Where the trenches are close together, in some instances so close that the fighters can talk to one another across their defenses, it is impossible to

trust a head above the ground without drawing the fire of half a dozen rifles.

Consequently the pocket periscope has been brought into use. The periscope is simple in construction, consisting only of two mirrors connected by a collapsible framework. Both mirrors are fixed to the framework at an angle of 45 degrees. When the framework is extended and the upper mirror is raised above the trench, the view is reflected by the upper mirror down to the lower one, which reflects the light rays horizontally to the eyes of the observer. The June Popular Mechanics Magazine contains a picture of the device.

Before this instrument came into general

use it was necessary to raise above the trenches every few minutes in order to prevent a surprise. These occasional moves endangered the life of the investigator. With the aid of the periscope the watcher may remain in the security of the trench and guard against any move from a trench within range of his vision.

Why It Is the RED Cross and Not Blue or Green

Why the Red Cross Society? Why not the Blue Cross or the Green Cross? How did the flag design so familiar on the battlefield in times of war, and at disasters in times of peace, come to be chosen?

The answer to these questions will be found in the following brief history of the Red Cross.

The movement had its origin in Europe. After the battle of Solferino, in 1859, Henry Dunant, a Swiss gentleman, visited the battlefield and spent several days there assisting in the care of the wounded. He was much impressed by the sight of the terrible suffering caused through lack of sufficient appliances and help for the care of the wounded.

In 1862 Dunant published a description of what he had seen, setting forth reasons for establishing in every country permanent societies for the relief of the wounded in war. His article was immediately translated into several European languages, and made a deep impression.

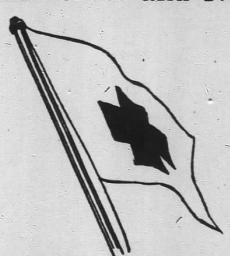

A society in Geneva, Switzerland, called the Geneva Society of Public Utility, appointed a committee, at the head of which was General Dufour, the general in chief of the Swiss Confederation, for the purpose of carrying out the proposals of Dunant.

Aeroplane Invented by Carpenter

ALBERT S. JANIN, a cabinet-maker of Staten Island, who has long been struggling to make both ends meet, finds himself suddenly raised from poverty to affluence through a decision of the board of examiners of the United States patent office that he and not Glenn H. Curtiss invented the hydro-aeroplane.

That Janin will become a man of wealth through the decision is without doubt, for an order for 200 hydro-aeroplanes at \$7,000 each is awaiting the manufacturer who can furnish security the machines can be delivered. As Janin now possesses the patent rights every manufacturer of the machines must pay a royalty to him. The 200 order is from one of the warring nations in Europe, and more will follow, no doubt.

In 1910 Curtiss began testing a canoe device to carry the plane on the water till the momentum to lift them was obtained, but it did not work.

ment. This led to an international conference, held at Geneva in October, 1863, which was attended by delegates from sixteen countries, and which called an international congress that met in Geneva in August, 1864.

The body held a session of a fortnight and drew up a treaty of nine articles, which has since obtained the approval of every civilized nation of the globe. This treaty looked to the neutralization of hospitals, materials, nurses and surgeons in time of war, and that these might be recognized.

Thomas A. Hill, a lawyer of New York, took up Janin's claims and put them before the examiners of interference of the patent office. Mr. Hill alleged that on July 3, 1910, Curtiss tried four times in vain to raise his plane from Lake Kenosha; also that Curtiss had admitted the failure. It was shown that drawings of the successful device now in use were made by Janin long before this date, and that he tried to build a machine to test it in operation, but couldn't get the money.

Curtiss contended that the device was his, and that it had failed at Lake Kenosha because the motors were not strong enough to do their share of the work.

Silver Arms Not Needed Now

WITH the announcement from the battlefields of Europe that Dr. Alexis Carrel, the noted surgeon, recently performed the startling feat of grafting the forearm of a dead soldier to the shattered stump of a wounded warrior, interest is renewed in the queer ways that people used to remedy such physical defects centuries ago.

For instance, there was "the man with the silver arm." He was Melchor de la Vega, the Count of Monclova, and Spanish Viceroy of Mexico in the latter part of the seventeenth century. He was sent out to take charge of New Castile in 1686.

Don Melchor de la Vega had lost his right arm in battle, and, inasmuch as surgery was not an advanced science in those days and a wooden arm was beneath the dignity of such a royal personage, he supplied its place with an arm of silver.

He founded the town of Monclova and began the construction at his own expense.

The Bee Is Busy but Unwise

THE bee may be a busy little insect, but it has no common sense. At least Henri Fabre says so, and Fabre, you know, has been called the "Insects' Homer" by Maeterlinck. Fabre gives many proofs of his assertion, for example:

He opened the bottom of a cell in the

course of construction, but the bee that was building it kept right on with its work, building up the cell and storing honey in it, quite unconscious of the fact that the food for the future generation was coming out, and finally laid its egg and sealed up the top of the cell, never paying any attention to the hole in the bottom.

U. S. Paraffin Good as Russian

LIQUID paraffin is so generally prescribed for constipation nowadays, and the makers of each of the several kinds are claiming superiority for their product, that the committee on therapeutic research of the council on pharmacy and chemistry of the American Medical Association investigated the relative merits of specimens of the best light and heavy Russian petroleum products and an American liquid petroleum.

Specimens were sent to several specialists and their reports are summarized by Dr. W. A. Bastedo of New York in the Journal of the association. He says that so far as their value as medicines is concerned the differences in the action of the three varieties are too slight to be of importance. There is a slight difference in the tastes of the oils, but this is a matter of individual preference.

Liquid paraffin in any of the forms is given in a dosage of from half an ounce to

three ounces a day, the effect being the same whether given all in one dose or in divided doses three or four times a day.

This discovery has been added to the numerous other revelations indicating that the United States is not nearly so dependent on European countries as was believed previous to the war. Chemicals that once were brought exclusively from Germany now are produced here, just as French fashions have, to a certain extent, given way to our own.

How Insignificant Is Made

BLADDERS of sound of fish, and is not of value except for this one purpose. In Russia, where the finest linglains is made, the sounds of the sturgeon are cut open and steeped in water until outer membrane separates from the inner; then the latter is washed and dried in the sun.

The social side of Tech commencement will open Monday evening with the junior "prom" and carnival on the campus. Miss Anne Patterson will be crowned queen. The following are her maids of honor: Misses Marian Slocum, Mary Crighton, Margaret Elson and Ayvylene Lance. Elaborately decorated floats representing the various departments of the school will form a background for the carnival scene.

Monday morning the sophomore class gave their German in the Crystal palace. Class day exercises take place Tuesday afternoon. Dr. and Mrs. G. O. Matthews give their annual reception to the graduating class of ninety. Invited to meet them are the alumni and forty young women who will assist in entertaining. Guests of honor will include Governor-elect Nathaniel Harris, of Macon, Ga., and Mrs. Harris.

Miss Beulah Aiken, of Brunswick; Miss Henrietta Davis, of Macon; Miss Kippie Juan, of Macon; Miss Cole, Miss Lane, Miss Hodgson, of Savannah; Miss Gillsbeth and Amelia Smith, of Athens, and Miss June Webb, of Athens.

Brooksher-Wylie.

The wedding at the First Methodist church, Dahlonega, Ga., Wednesday evening, of Miss Brooksher to Mr. Wylie, of Clarksville, Ga., was a beautiful occasion. The bride and groom were both in southern militia uniforms. The ceremony was performed by Rev. W. H. Barnett. Miss Fannie McGee played "Hearts and Flowers" and the bride was given away by her father, Mr. J. M. Brooksher, a prominent business man of this place. She wore a beautiful white satin gown and tulle veil caught with a wreath of orange blossoms. She was attended by her sister, Mrs. Vernon Moore, the maid of honor, who wore a white chiffon over net and carried a bouquet of pink rhododendrons. The bridesmaids were Misses Nell Cavender, Maud Waters, Rose Meaders, Miss Meadows, and Bertie Anderson and were all gowned in white organdy with pink tulle sashes and carried bouquets of pink tea roses.

The groomsmen were Messrs. Carl Brooksher, Alex. Glenn, Joe Rogers, George Galtney and Warner Wylie. Mr. Paul Brooksher acted as best man. Little Misses Margaret Meaders and Steven Moore were the flower girls and were attended by Master Robin Brooksher as page boys. The wedding reception was held for the bridal party at the home of Mrs. Brooksher, a beautiful home, which was tastefully decorated in pink and green. Miss Oia Smith and Maud Waters presided at the punch bowl. Mrs. Brooksher was assisted in entertaining by Messrs. E. C. Meaders, W. J. Fry and Rufe Baker.

A number of pretty parties were tendered the bride the week before the wedding, among them being a linen shower given by Mrs. R. C. Meaders and the dinner given by Messdames Jones, Cowan and Gailard.

For Miss McElmurry.

Miss Frances Broyles entertained at a beautiful luncheon yesterday at her home on Juniper street in compliment to Miss Mary McElmurry, of Waynesboro. A large wicker basket filled with pink sweet peas and white lilies was the centerpiece of the table, and orange bouquets of lilies marked the guests' places. Miss Broyles wore a white lingerie gown and Miss McElmurry wore a pink embroidered mull with pink hat.

The guests invited included twelve school friends of the hostess and guest of honor.

For Miss Steedman.

Miss Margaret Clifton entertained at a pretty bridge party and handkerchief party Friday afternoon at the home of her sister, Mrs. S. J. Cougle. Miss Clifton was in compliment to Miss Marcella Steedman, a bride-elect. Sweet peas and growing plants decorated the home. The prizes at bridge were dainty handkerchiefs.

Miss Clifton wore a white lingerie gown and Miss Steedman wore white tulle and a white tulle hat. There were nine guests.

Mrs. Ruby Bennett will entertain at bridge Monday for Miss Steedman.

For Miss Aiken.

Miss Fred Zerk entertained at a beautiful luncheon yesterday at her home on Euclid avenue for Miss Aiken. The occasion was the Tech commencement. Mr. John Lucas will give a matinee party Monday in her honor, and Miss Aiken will be the guest of honor.

After a wedding trip, Mr. and Mrs. Field will be at home in Detroit.

DeSaussure-Field.

The wedding of Miss Mary Chestnut DeSaussure and Mr. Alexander C. Field, of Detroit, was a pretty event of yesterday, taking place at noon at St. Luke's Episcopal church.

The bride and groom were both in southern militia uniforms. The ceremony was performed by Rev. W. H. Barnett. Miss Fannie McGee played "Hearts and Flowers" and the bride was given away by her father, Mr. J. M. Brooksher, a prominent business man of this place. She wore a beautiful white satin gown and tulle veil caught with a wreath of orange blossoms. She was attended by her sister, Mrs. Vernon Moore, the maid of honor, who wore a white chiffon over net and carried a bouquet of pink rhododendrons. The bridesmaids were Misses Nell Cavender, Maud Waters, Rose Meaders, Miss Meadows, and Bertie Anderson and were all gowned in white organdy with pink tulle sashes and carried bouquets of pink tea roses.

The groomsmen were Messrs. Carl Brooksher, Alex. Glenn, Joe Rogers, George Galtney and Warner Wylie. Mr. Paul Brooksher acted as best man. Little Misses Margaret Meaders and Steven Moore were the flower girls and were attended by Master Robin Brooksher as page boys. The wedding reception was held for the bridal party at the home of Mrs. Brooksher, a beautiful home, which was tastefully decorated in pink and green. Miss Oia Smith and Maud Waters presided at the punch bowl. Mrs. Brooksher was assisted in entertaining by Messrs. E. C. Meaders, W. J. Fry and Rufe Baker.

Dinner Party.

Mr. and Mrs. George Richmond were hosts at an informal dinner party at

their home in Ansley Park during the week. Their guests being Mr. and Mrs. Drury Powers, Mr. and Mrs. William and Dr. and Mrs. Thornwell Jacobs.

Hollingsworth-Greer.

The wedding of Miss Nettie Lee Hollingsworth and Mr. Carroll Theodore Greer will take place on the evening of June 11 at 8 o'clock in Westminster Presbyterian church. Dr. A. A. Little officiating. Mrs. Charles Greer will be matron of honor. Miss Mary Louise Everett maid of honor and Miss Laura Jones bridesmaid. Dr. Clarence R. Greer will be his brother's best man, and Mr. Roy Butler, of Chatsworth, and Mr. Carl Lanford will be groomsmen.

Little Misses Edna Lawson and Evelyn Hollingsworth will be flower girls. A reception at the home of the bride's aunt, Mrs. O. Thomas Lettmer, on Angier avenue, will follow the ceremony.

For Miss Hollingsworth.

Miss Mary Louise Everett entertained at her home on Piedmont avenue last Tuesday afternoon at a miscellaneous shower for Miss Nettie Lee Hollingsworth. A bride-elect. Thursday afternoon she shared honors with Miss Janet Little and Miss Roberts Jewell at the Forty-two party given by Mrs. Weburn and Miss Hollingsworth. Tuesday morning June 10, Mrs. W. E. Beasler will entertain at a luncheon for Miss Hollingsworth.

Saturday June 12, Mrs. W. E. Beasler will entertain at a shower for Misses Nettie Hollingsworth and Roberts Jewell. Mrs. Charles Greer will entertain the wedding party Monday afternoon after the rehearsal at a buffet supper.

D. A. R. Rummage Sale.

The Atlanta chapter, D. A. R., will have a rummage sale Friday and Saturday, June 11 and 12, on Edgewood avenue. Mrs. Dula Griffin is chairman for Friday and Mrs. C. B. Walker for Saturday.

Members of the chapter are urged to give rummage for this sale. If notified, Mrs. J. M. High, Mrs. T. J. Ayer, Mrs. J. D. Kennedy and Mrs. C. B. Walker will collect the rummage in their automobiles.

Atlanta Chapter, U. D. C. The last meeting of the Atlanta chapter, U. D. C., until September will be held Thursday afternoon at 3:30 in the Woman's club. The executive board is requested to meet at 3 o'clock in the committee room.

Dancing Party.

Mr. and Mrs. Jeff Dobbs entertained at an informal dancing party on Friday evening of the last week at their apartment in the Colonial. Twenty guests were present.

Operetta at Marist Hall.

"Elizabeth of Thuringia," an operetta in two parts, by the Italian writer, Luigi Bardone, will be presented by pupils of the Academy Immaculate Conception at Marist college hall and will be a charming feature of their closing exercises, to be held on the evening of June 10.

THE YOUNG TURK

How Did The Teuton Get The DE

By J. J. Bosdan.

Formerly a member of the Executive Committee of the Late Young Turkey Society of Asia Minor and Propagandist for India, Persia and Egypt—A Native of Adana, Asia Minor of Greek Extraction.

HE annual interest charged on part of the Ottoman government's national indebtedness, the part covered by loans amounts to about one-third of its actual revenue.

All in all, before she entered the war, Turkey's net revenue was equal to one-seventh of the interest due on her total indebtedness. After the Balkan War, loan as she was in international shackles, Turkey added links to her chains, until she had mortgaged every available harbor, river, forest and mine to European bankers. And now, without money, men or prestige, here she is again shackled to allies who cannot help her; isolated, fighting three first class Powers, who are striking her from both flanks, rear and front.

We will be certainly defeated, and immediately afterward we will start all over again, "doing business at the same old stand," whatever is left of our "integrity" will be "guaranteed" jointly by our combined enemies and friends, and we will continue paying interest on our national debts; for we are a hopeless case.

Had we been any other nation or people we would have been annihilated two hundred years ago, but we are Ottomans, and being Ottomans we have a charm all our own. This charm is our debt to all nations.

But that was not all. Ever's sojourn in Berlin had its evil effect. Within two months after the proclamation of the new Ottoman Constitution many feuds and frictions arose in the ranks of the party itself; these feuds were those of the liberal and nationalist Young Turks. The liberal Young Turks attempted to commit the empire to a "liberal policy," and demanded the recognition of the equality of all elements throughout the empire in the eyes of the constitution, while the nationalists insisted on adopting a policy of nationalism, which they named "the Committee of Union and Progress." They demanded that all elements unite for the progress of Turkish nationalism. This "Union and Progress" is the equivalent of the "German Kultur," and was backed up by the newly converted "Turkish Junkers."

Thereupon the liberal element within the Young Turkey party, having already been disgusted with the behavior of the nationalist clique, which was playing the part of the power behind the throne, formed a secret parliamentary coalition with the conservative Old Turks and formulated a program for a permanent future policy. This scheme was to permit such numerically predominant Christian sectors of Turkey's Macedonian possessions to unite with such Balkan kingdoms as they chose to recognize the independence of the Albanians, and, having thus eliminated the eternal cause of discord in the Balkans, to form an entente with newly created Albania, and then with Montenegro, Serbia, Bulgaria and Greece; and, after having assured the security and the integrity of the Ottoman empire, to adopt a stern foreign policy. In the meantime, serious and swift internal reforms were to be undertaken.

This would have prevented the Balkan war, perhaps the present European conflagration. The program was submitted to Sultan Hamid and, after one week's deliberation, was approved in its entirety. Early in January, 1909, however, the German Ambassador got wind of these negotiations between the coalition and the Sultan. The nationalists immediately isolated themselves with calumnies against the Christian members of the Parliament. They incited the Moslem elements in the remote regions of the empire against their Christian countrymen. Meanwhile they arrested the liberal members of the Young Turkey party, denouncing them as plotters of a reactionary counter revolution against the constitution. Finally, in March, 1909, the nationalists succeeded in staging a counter revolution in order to create a "pretense" to overthrow Abd-ul-Hamid and put an end to the coalition's Balkan program. The memorable Adana massacre was to be carried through first, and the counter revolution afterward. The object was to connect Abd-ul-Hamid with massacre, but something went wrong and the plan was disarranged. Nevertheless, the perpetrators were not to be foiled. They carried the devilish program through.

Ever Bey returned from Berlin and once more figured in the limelight beside Mahmud Shekret Pacha, when the latter made his triumphal march to Constantinople, suppressing the so-called counter revolution with an iron hand, deposed Abd-ul-Hamid and put the present weak Sultan on the Ottoman throne. It was after this second revolution that the Old Turks, as well as the liberal Young Turks, were hanged or sent out to Anatolian provinces to build roads. Then, dispensing with the liberal Young Turks as no pretext or another, the "Committee of Union and Progress" (the Turkish Kultur, took full charge of the new regime and controlled the foreign and the domestic policies of the empire. This new revolution having cost more than \$15,000,000, the new regime was already under pecuniary obligations to the German financiers, who, representing themselves as German and Austrian Jews, had generously financed this second revolution.

So far as German interests were concerned, this sum was well spent. Germany did not wish to have the Ottoman empire absolutely independent in her dealings with the European Powers.

The elimination of the Macedonian question from the Turkish national policies would upset the Pan-Germanic dream, "from Berlin to Bagdad," forever. She had hitherto solidified herself as the patron of the Turk.

The counter revolution and the consequent establishment of a newer and more efficient despotism under a new name in the capital of the Turk had amazed the political students of the world. The fragmentary cable dispatches never explained the peculiar workings of the Near Eastern politics. The energetic protests the liberal Turks, as well as the serious warnings of the Christian population of Turkey, were drowned in the well intentioned but subverted praise of the Western world. The West did not and was not in a position to understand that the "Committee of Union and Progress" was a Turkish term for German Kultur and Prussian Junkery.

During the Balkan war Ever was away at Tripoli, but during the sessions of the first Balkan conference in London, in 1913, having already arrived in Constantinople, he directed his every energy to preventing the cession of the besieged city of Adrianople to the Bulgars. Finally, when the Turkish government made up its mind to accept the proposal of the Ambassadorial conference in London, Great Britain detained these ships, the Turk's anger knew no bounds. It was the straw which broke the camel's back.

The German party took advantage of the situation created by Great Britain's naval exigency. No promise on the part of the Western Allies "to safeguard Turkey's integrity against any and all unforeseen enemies" could satisfy her.

This predominant German influence in Turkey dates back to the Kaiser's visit to Constantinople on his way to Palestine, for it was to Asia Minor that Germany had turned her longing eyes.

In the days of Abd-ul-Hamid, when the palace clique ruled supreme at Yildiz, the highest bidder obtained political and commercial ascendancy in the empire. Beginning in this simple city, it went through various stages of evolution until Prussia had availed herself of every opportunity in strengthening her hold over every governmental function of the empire.

The Prussian exercised control over the Turk's civil government, taught him how to drill, sold him Krupp guns, ran his railroads, owned his copper and silver mines, built his schools, acquainted him with the German Kultur, and finally dominated his empire. He represented to the Young Turkey leaders that no matter what regime might come to power the Ottoman foreign policy must remain exactly the same. Baron von Bielestein argued that whatever the defects of the Hamidian regime might have been it had a wholesome regard for the safety and the integrity of the Ottoman empire. This meant the unrevoked continuation of the old Hamidian foreign policy. The civilian members of the Young

Hamidian regime that had contributed to intensify the Young Turkey spirit in Turkey.

With the overthrow of the Hamidian regime in 1908 and the advent to power of the Young Turks, the progress of the German influence in Turkey came to a standstill; but this was only temporary.

Baron Marshall von Bielestein, Germany's able diplomatist, soon gained the confidence of the new regime. He represented to the Young Turkey leaders that no matter what regime might come to power the Ottoman foreign policy must remain exactly the same. Baron von Bielestein argued that whatever the defects of the Hamidian regime might have been it had a wholesome regard for the safety and the integrity of the Ottoman empire. This meant the unrevoked continuation of the old Hamidian foreign policy. The civilian members of the Young

sions were busy reorganizing the fleets of the two prospective belligerents.

This war between Turkey and Greece would have been declared last summer had it not been for the timely purchase of the two American cruisers which made the Greek fleet in the Aegean Sea superior to that of Turkey.

Meanwhile two dreadnoughts were being built for Turkey in the British shipyards. The funds for these dreadnoughts were raised through popular subscription, and when, upon the outbreak of the European war, Great Britain detained these ships, the Turk's anger knew no bounds. It was the straw which broke the camel's back.

The German party took advantage of the situation created by Great Britain's naval exigency. No promise on the part of the Western Allies "to safeguard Turkey's integrity against any and all unforeseen enemies" could satisfy her.

This predominant German influence in Turkey dates back to the Kaiser's visit to Constantinople on his way to Palestine, for it was to Asia Minor that Germany had turned her longing eyes.

In the days of Abd-ul-Hamid, when the palace clique ruled supreme at Yildiz, the highest bidder obtained political and commercial ascendancy in the empire. Beginning in this simple city, it went through various stages of evolution until Prussia had availed herself of every opportunity in strengthening her hold over every governmental function of the empire.

The Prussian exercised control over the Turk's civil government, taught him how to drill, sold him Krupp guns, ran his railroads, owned his copper and silver mines, built his schools, acquainted him with the German Kultur, and finally dominated his empire. He represented to the Young Turkey leaders that no matter what regime might come to power the Ottoman foreign policy must remain exactly the same. This meant the unrevoked continuation of the old Hamidian foreign policy. The civilian members of the Young

WHY DID THE TURK ENTER THE WAR

key element, Hilmi Pacha proclaimed the Ottoman constitution, in the name of Sultan Abd-ul-Hamid, from the steps of the Provincial Capitol at Salonica, on July 24, 1908.

Ahmed Riza Bey, who had spent many years in Paris as a refugee and publisher of revolutionary literature, returned to Constantinople and became the President of the first Turkish Parliament. But from the first day of the Young Turkey party's advent to power it adopted a nationalist policy based upon "Turco-Mohammedanism"—that is, it asserted that, the Turk, being numerically predominant, the empire's affairs must be conducted with due consideration to the Turkish nationalist aspirations, and Mohammedanism must be recognized as the official State religion, while other religions must be recognized by the new Turkish constitution as foreign religions, "chartered and privileged."

The 800,000 Turkish Christians resident throughout the empire considered this as an indirect disfranchisement of the non-Moslem elements, who are intellectually and economically superior to the numerically predominant Moslem Turk. While thirty-three per cent of the population of the empire is Christian of various denominations, under the Young Turkey party's management of the first election proceedings the Christian elements were unable to elect more than six per cent of the Parliament's membership.

The old Hamidian cunning diplomacy, setting one European Power against the other as the exigencies required, was not effective under all circumstances. My country had accepted Germany as its protector in our past dealings with other European Powers, and now Germany was in dire need of Turkey's forces in her war against Europe. Turkey had to fulfill its obligations to that Power. But this was only a formal excuse for Turkey's policy of leaning its weight on the side of the Teutonic allies; the whole truth is that it had nothing to say regarding the matter. Turkey was already being ruled by the Germans.

When at last the great conflagration broke out the Turkish nationalism became a virtue, while the German gold made patriots out of the ill-paid Junkers. Expressions such as "the redemption of the lost provinces" and "war for the fatherland" became Ottoman slogans. Finally the Western Allies became convinced that Turkish neutrality was not likely to endure very long.

Turkish mobilization had already begun, but Germany was bound to hasten the crisis. On August 10, 1914, the two German war ships Goeben and Breslau arrived at the Dardanelles and the very next day they became Turkish. On August 14 Admiral Limpus and all the officers of the British Naval Mission were replaced by the Germans, and the mobilization of the Ottoman land and sea forces continued under German auspices. Every train from the west brought hundreds of German military and naval officers, until the entire province of Constantinople and its surrounding districts had become a German camp. The civilian Moslem population of the capital seemed paralyzed with this peculiar invasion of their country. The martial law which had been in existence since the advent of the Young Turks to power was relentlessly used in suppressing opinions contrary to the policies of the regime in power.

During these critical days hundreds of German military officers were shot as traitors. The ill-paid soldiery, hopelessly ignorant of the significance of the German military incursions into our country, regarded the foreigners as the benefactors of the Turks. The German-controlled regime disarmed all the Christian soldiers in the army and put them to work as common laborers, building fortifications and military roads. Those who had the courage to raise their voices condemning the policies of the military regime were dealt with in such a fashion that they were never heard from again. But there were other methods, more effective means, to silence opposition.

Suddenly an army of Moslem slaves (scleragians) were imported and, backed up by all the Turkish newspapers, these Mohammedan zealots began an energetic campaign in the city. The newspapers published reports of the "horrible crimes" committed by the Western Allies against the Moslem subjects in Africa, Egypt, India and elsewhere. These reports were sent broadcast throughout the Anatolian provinces. The Moslem slaves incited the Turks to take up arms in defense of these suffering Moslems.

By the middle of September there were about 40,000 German soldiers and sailors in Constantinople. On October 25 \$20,000,000 in gold bullion was imported into Constantinople, consigned to the German Ambassador and delivered at the Deutsche Bank. This act of Germany turned the scale.

On October 29 three Turkish torpedo boats raided Odessa Harbor, sinking a Russian gun ship and damaging a French steamship and killing several Russian civilians. Theodosia was also bombarded. It is also true that neither the Sultan nor the majority members of the Cabinet had knowledge of these attacks.

No, this war is not the Turk's war. But yet, he had committed himself to this suicidal policy, since he had allowed the unrestricted importation of the German civilization into his shores.

Turkey's Anatolian borders are fighting the Western Allies under the delusion that they are at war for their Moslem faith. But the Turks are beginning to realize that they have been tricked to do their dirty ally's fight for the Turks. There is an ugly feeling in Constantinople, but Turks are slow in everything—slow in starting and slow in stopping.

Following the successful revolt of the Young Tur-

Bronze—Albert Sikes, Willard Davis, Charles Ragsdale, Oscar Silverman.
Kenneth Yancey, of the third A, was the youngest and smallest boy in Fraser to receive a bronze badge.
Samuel Tenenbaum and Lucile Roper led the seventh B for the entire year.
Those that led the sixth B are Al

Padi Lambert, Hsienche Kates, Nellie Weaver and the "Wendy" girls. The third had a fine entertainment and a very successful fund raising. There were several recitations, plays, songs and dances. The girls of this grade. We are sure that experience has made them all done to better, and the whole entertainment was a success. The girls at the old Fraser.

The fourth made the highest average for the entire year, which was a very good proof of them.

Our society held a very interesting and a delightful program was rendered.

As follows:

John Storm, seventh; Lucie Roper and the Wendy girls, eighth. According to the declaration delivered by Lucette Catts, of seventh A.

BATTLE HILL

Seventh Grade Has Interesting Program on Last Day

By Nancy Tripp.

Our boys and girls have taken our last examinations. School will close in a few days and of course we all will be glad to get home. We will not have to go to summer school. Our teachers will be glad to see the whole class to the high school, and the girls will be glad to go to the college.

The eighth grade had a very nice program for a last of school entertainment. The program was:

A melody of national songs by the seventh grade.

Medal content by the boys.

A play, "The Wonderful World" by eighth A.

Medal content by the girls.

A play, "The Wonderful World of Big Jim" by the seventh grade.

A play, "The Wonderful World of Big Jim" by the seventh grade.

The medals for the year were awarded to the following:

Charles Mooney for the boys. The Pauline Catts for the girls.

This has been a splendid year of success. Many have been the excellent debates and exercises held in the school auditorium.

In athletics Slaton finished third in the soccer and baseball leagues.

IRA ST. SCHOOL
Interesting Recitations Delivered at Close of School.

The parents and teachers are all so proud of the boys and girls of the foreign born and of the children of foreign schools, and they are proud of themselves, especially when they get the honor of having a child in the school.

The last few days have been very happy ones. Tuesday the seventh was the annual election of officers. The winners were Willie Belle and Edna. The runner up was Edna. The winners were:

Willie Belle of Old Glory, Edna Williams of the Church, Annie Louise Williams of the Church, May Harris of the Day Is Done, Willie Belle Plummer of the Day Is Done, and Edna of the Republic or a Monarch. Edgar Brown of the Day Is Done.

John Temple Graves' Tribute to Henry Clay was read by Edna Williams, the Grand of Robert E. Lee. Gordon of the Day Is Done.

We thank Mrs. W. B. Nunnally for her very kind and generous contribution of a cake made by her. Miss Cora Brown, of the Day Is Done, and Edna of the Republic.

The ladies of the Parent-Teacher Association decorated the school beautifully with flowers. The first and second graders and the sixth and seventh grades. Everybody had delightful parties.

Forty-two children rode out smiling and happy. The first and second grades with twenty. They were very happy and enjoyed the ride.

Resolved, That every male citizen of the United States between the ages of 18 and 20 should be required to serve one year in the United States army." The speakers on the affirmative side were Courtland Jordan, leader; Edmund

The second grade had a play in the seventh grade room last week that was very interesting. The principal characters were: Mother, Dorothy Phillips; Father, Howell Doss; Gretel, Emma Frances Brotherton; Hansel, Lawrence Stallworth. There were also several

In the sixth grade Jessie Doss had the best of the class. She has a history notebook and a book of Tattle, one of the seventh grade pupils looked up putting them in, and the fourth grade has done some very good work in the last week. The four boys and four girls who were in the class were: Mooney, Sara Bailey, Margaret Brown, Mary Ann, and the boys, Landers, Harry Brown and George Watson.

The first grade has done excellent work in the last week. The boys and girls, their music teacher, has given them a very good performance. Very fine she came to our school.

In the first grade Jessie Mulkin has had the best of the class. She have had a great deal of bad weather in the last week. The boys and girls were: Lucy Fisher had better attend carefully in the last week. The boys who have been neither absent nor tardy were: Harry and Harold Stallworth and Harold Stallworth.

Hot Hum! Who Cares?
(From The St. Louis Globe-Democrat.)
"Inferentially, Mr. Bryan is a honest man."

warded for the best speaker. The boys' medal was won by Joe Davison, who recited Henry Grady's "New South." The affirmative won the debate. To the audience the speakers wish to express their appreciation for their kind presence.

To our sorrow, we leave Slaton Fri-

hours we have spent there with the back over our records we saw a year's work in a few minutes.

Let us now look forward to the future.

**KIRKWOOD SCHOOL
CLOSES GREY YEAR;
OVER 400 PUPILS**

Under the able supervision of Miss Myra Robinson, the Kirkwood public school closed its grey year in its history—being over four hundred.

The best record of attendance was made by the eighth grade, who has not been tardy for over a year.

Twelve boys passed the examinations for the high school.

Twenty girls passed the first grade high school examination to enter the high school.

Miss Lewis Fowler granted a scholarship to Miss Otis Le Maine, of the second grade without entrance examination.

Records of the young ladies, who completed the course of study last year, are as follows: Misses Myra Robinson, Georgia, Normal and Industrial school; Myra Robinson, Normal and Industrial school; Myra Robinson, Normal and Industrial school.

Many Pupils Have Perfect Records in Attendance.

By Minnie Jefferson.

The following children have had per-

SOCIAL ITEMS

Mrs. C. C. Simmons has returned to her home in East Point after a visit to Mr. and Mrs. S. C. Simmons, in Dallas, Ga.

Mrs. Edna Conder, of Palmetto, is the guest of Miss Maudie Upchurch, in East Point.

Mrs. J. R. Campbell and son, William, of Wainwright, are guests of Mrs. Shannon, in East Point.

Mrs. D. N. Hudson, of East Point, is recovering from a few days' illness.

Mr. and Mrs. George C. Simmons, of Villa, Ga., announce the birth of a son.

Mr. and Mrs. J. Wayne have returned to East Point after a pleasure trip in Florida.

Mrs. C. R. Henry, who has been seriously ill for several days at her home in East Point, is slightly improved.

Mrs. A. C. Hemperley, of East Point, will go to Jacksonville, Fla., after the 15th to visit Mr. and Mrs. Ernest Hemperley.

Mr. J. R. Sims has returned to Gainesville.

Charlie, the little son of Mr. and Mrs. E. J. Hansen, of East Point, is suffering from a broken arm.

Mrs. E. L. Shields, of Blountville, Fla., is the guest of Mrs. L. L. Wells, on Ware avenue, in East Point.

Mr. Breakah Cobb, of East Point, is spending a while in Norcross with friends.

Mr. and Mrs. E. S. Center have re-

turned to College Park after a tour through the east.

Mrs. Lillie Bailey has returned to Kingston after a visit to relatives in East Point.

Mrs. W. A. Bayard, of Jacksonville, Fla., is visiting her parents, Mr. and Mrs. M. F. Perryman, in East Point.

Mrs. A. T. Vandiver has returned to Jefferson Park after a visit to her mother in Carterville.

Mrs. Ethel Coppage, of Brooks, Ga., is visiting relatives in the city.

Mrs. M. E. Almont is ill at the home of her daughter, Mrs. Lee Wells, in East Point.

Mr. M. O. Blackwell has returned to his home in East Point after spending several weeks in North Carolina.

Mrs. S. N. Thompson and young daughter, Eloise, are in Hampton, where they are guests of Mrs. Wherry Roan.

Mrs. W. H. Gibbs, of East Point, has as her guests Missie Richardson, of East Tallahassee, Ala., and Miss Lella Cook, of Fairburn.

Mrs. L. P. Moy has returned from a visit in Barnevillie.

Mr. T. J. Smith, of East Point, is in Richmond, Va., for a few weeks.

Mrs. E. P. Nixon is ill at her home on Chattahoochee avenue, in East Point.

Mrs. E. A. Wilson and little son, Edwin, who have been guests of Mrs. John T. Pittard, in Wainwright, have returned to their home in East Point.

Mrs. A. O. Benton is visiting in New York.

Miss Nellie Hearn has gone to Fair-

burn to spend the summer with relatives.

Dr. A. R. Holdrege will begin a series of revival services in East Point this morning at 11 o'clock. He will be assisted by Rev. Frank Hunt.

Mrs. C. B. Harrison is visiting relatives in Forsyth.

Mrs. Mary Pratt Lake returned home Friday from Hollis College, Va.

Mrs. Henry Dickson Bruns, of New Orleans, President of the Colonial Dames of Louisiana, was the recent guest of her cousin, Mrs. O. L. Pratt, in Druid Hills. She left on Tuesday for Richmond to attend the C. V. reunion and on her return will again be the guest of Mrs. Pratt.

Mrs. Richard Spencer, of Columbus, passed through Atlanta Monday on her way to Richmond to attend the reunion. She will visit Virginia Beach before returning home.

Mr. and Mrs. George Lewis Pratt and children, the last of the month will go to St. Simons, where they have taken a cottage for a month.

Mrs. Persia Griggs, of West Point, Ga., is visiting her aunt, Mrs. A. L. Winter, on West Peachtree street.

Mrs. Eugene Row and Mrs. C. M. Knight, of Seneca, have returned home after spending several days here.

Mrs. J. C. Clark has returned from a short trip in Florida.

Mr. and Mrs. John Rooney, of 254 North Moreland avenue, announce the birth of a son May 25, who has been named Billy Laurence.

Mrs. Maudie O'Neil, Kirkpatrick and Miss Lawson Hines are the guests of Miss Edna Roberts of Fairburn at a house party she is entertaining.

Mr. and Mrs. Howell Cloud have re-

turned from Griffin, where they went for the funeral of Judge Robert Daniel. They were the guests of Mr. and Mrs. Robert Strickland.

Mrs. Charles Martin, of Sheffield, Ala., is convalescing at St. Joseph's infirmary. Mrs. Martin was formerly Miss Ruth Holcomb, of this city.

Miss Minnie Wood, of West Point, is the guest of Miss Vivian Clayburn, in West End park.

Mrs. B. L. Motie left yesterday for a stay of two weeks at Chick Springs, North Carolina.

Mrs. H. E. McCormick and little son left Thursday for Atlantic Beach.

Mrs. Mary Glenn has returned from Columbus.

Mrs. Buford Aiken, of Brunswick, will arrive today to visit Miss Marian Denson.

Dr. and Mrs. Charles Bowman have returned to Birmingham after a visit to the funeral of Judge Robert Daniel. They will return to Atlanta the first of July to make their home.

Hon. and Mrs. M. H. Couch, of Seneca, are the guests of Mr. and Mrs. Sterling J. Elder.

Mrs. P. P. Brodie and Miss Ruth Carr Benson are visiting Mrs. Howells's sister, Miss Helen Bradford, at Clemson College, S. C. They will remain until after commencement, when they will go to the mountains.

Mrs. George E. Nolan and children, Henrietta and George, Jr., are in the city, and will be the guests while here of Mrs. Nolan's sister, Mrs. S. J. Elder and Mrs. George Pollock.

Miss Rebecca Graham, of Outhbert, is the guest of Miss Hattie Harrison.

Mr. and Mrs. C. Smith, of High Point, N. C., will be the guests of Mr. and Mrs. George Westmoreland for the second-smith wedding. They arrive Tuesday.

Miss Lillie Mae Wright, of Eastman, is the guest of Miss Lila Powell.

Miss Mamie Callaway, of Chattanooga, is visiting Miss Nettie Lee Hollingsworth.

Miss Miriam Sykes, of Columbus, Miss is the guest of her cousin, Miss Fannie May Otley.

Mrs. J. A. Bradberry, of New York, is visiting his mother, Mrs. Louis Bradberry.

Miss Vivian Brown will leave Tuesday to visit her grandparents, Mr. and Mrs. G. W. Barker, at Tarpon Springs, Fla.

Miss Elizabeth Morton leaves today for Wrightsville Beach.

Mrs. Sheppard W. Foster, who has been very ill for the past four weeks at her home on Peachtree street, is slightly improved.

Mr. Madison Bell and his mother, Mrs. Mary Bell, are at St. Simons for the meeting of the Bar association.

Mr. David W. Johnston, Jr., has returned from Johns Hopkins university, where he took a post-graduate course in political science.

Miss Ralston Moncrieff left Thursday to spend commencement week in Mil-lekeesville.

Miss Mary Ray and Miss Winnie Crawford, of Calhoun, are the guests of Miss Edith May Chastain.

Mrs. James T. Williams and Miss Mary King will leave Wednesday for Clayton.

Dr. and Mrs. Robin Adair are at pas-

sageville, Fla., for two weeks. On their return Mrs. Adair and children will spend a month at St. Simons Island.

Mrs. H. M. Comer, of Savannah, arrived in the city yesterday, and is the guest of Mr. and Mrs. Clark Howell at Pine Hill. Mr. John Comer spent the week-end with Mr. and Mrs. Howell.

Mrs. Harry English, who has been ill, is recovered.

Mrs. E. R. Houdley, of Starr, S. C., is spending a few days with Mrs. Thomas R. Walton, of Whitehall terrace.

The reading class meets with Mrs. Clark Howell Friday.

Miss Mary Ross arrives home Monday from a visit to Memphis, and will have with her as her guest Miss Mary Plant, of Macon. They will be among the young society set participating in the activities of the Tech commencement.

Mrs. J. H. Biegler, Mrs. Max Kuttner and Miss Ruth Kuttner, of Rome, leave today for Albany, where they go to attend the wedding of Miss Fannie Maier and Mr. Sidney Biedler, which will be a event of Tuesday.

Mrs. J. M. Chandler, of Sumter, S. C., has been ill for two weeks at St. Joseph's, is now convalescing at the home of her sister, Mrs. Arminius Wright.

Mr. and Mrs. Adolph Samuels had as their guests the past week on a delightful motor trip to Mason and the peach orchards around Port Valley. Mrs. Sol Samuels and Mrs. Amelia Marks, of Brunswick, Ga. The party returned here Friday.

Misses Mary McCall and Jessie Miller are visiting Miss Timmie Edwards in Cleveland and attending Emory commencement.

Mrs. Frances Rowland, of New York,

is the guest of Mr. and Mrs. Forrest Adair.

Miss Goldie Harty left Wednesday for Louisville, Ky., to visit Miss Sarah Clore.

Miss Angie McCoy Harding, who has been very ill at the Grady hospital for the past four weeks, is much better.

Mr. and Mrs. James Henry Goldsmith announce the birth of a son on June 2, who has been named James Holmes.

Mrs. Gordon Kiser returns today from a visit to North Carolina.

Mrs. H. M. Dunwoody, who has been detained ill at St. Joseph's following an operation, is now better.

Miss Frances Broyles returned from Lucy Cobb Friday. She will return to Athens for the university commencement and will be the guest of Miss Row.

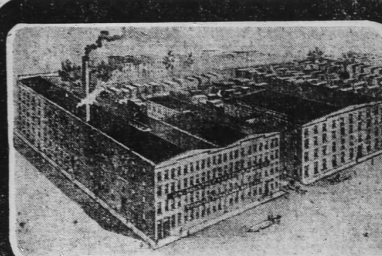

Miss Ethel Brinson Smith will leave in a few days for Virginia, where she will spend the summer.

Mr. Hill McCaslin, of Newnan, is spending a few days with Mr. and Mrs. Arnold Broyles.

GREENSBORO, GA.

The many friends of Mr. M. R. Burns, of this place, were interested to learn of his approaching marriage to Miss May Plaker, of Washington, which will occur this month at the home of the bride's sister, Mrs. Thacker, of Atlanta. The announcement occurred in last Sunday's Constitution.

The booster committee closed a very successful campaign here Wednesday evening. Greensboro caught the "Chastique" spirit and signed a contract for the Radcliffe chalet for next winter. Among the most enjoyable numbers given were those by the Laubel Concert company and the Strollers' Male quartet.

you save the retailer's profit on whatever you buy here. And now that we have reduced the prices from 20% to 40% during this Annual Factory Clearance Sale, you have an extraordinary opportunity offered you.

We want to impress on YOU the real meaning of "ROUNTREE QUALITY" closely linked with "ROUNTREE LOW PRICES" for we know that once you realize what buying direct from the factory, and thus saving the retailers' profit, means in dollars and cents to you, you will understand WHY it pays to buy from ROUNTREE. Note the prices on our high quality goods listed in this advertisement, and also note very carefully the reductions made especially for this matchless Factory Clearance Sale.

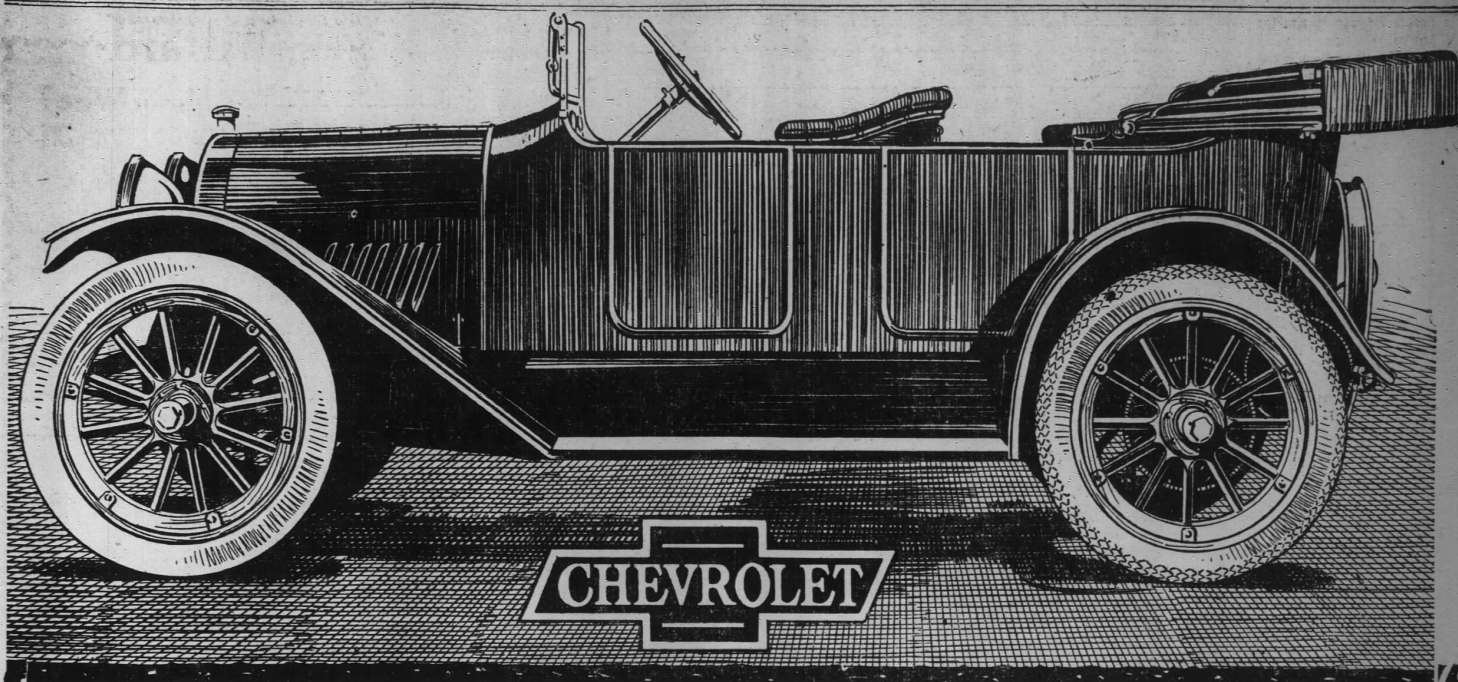

ATLANTA RETAIL STORE.

Ladies' Fibre Wardrobe Trunks Single and double trolley hangers. Twenty-five models; square and round edge. Regulation 45 inches high, 23 inches wide, 16 1/2 to 26 inches deep. \$25 to \$72.50	Fibre Covered Roller Tray Trunk Fourteen models, each model in five sizes. \$10 to \$35	General Purpose Trunk Canvas covered—fibre and iron-bound. Twelve models. Each model in five sizes. \$2.50 to \$10	Men's Trunks Tray fitted for shirts, collars, ties, hat rest, etc. Eighteen models, each model in four sizes. \$6.50 to \$17.50	Gentlemen's Fibre Wardrobe Trunk Single and double trolley hangers. Thirty models. Square or round edge. Regulation 45 inches high, 23 inches wide, 14 1/2 to 23 inches deep. \$20 to \$72.50	Suit Case Bags In smooth grain cowhide and real walrus. Seven different models, and two different sizes of each model. Colors tan, brown or black. \$10 to \$27	Club Bags Leather Cloth and Matting. In brown or black; cloth lined. Japanned frame, with brass trimmings. Seven models, and each model in three sizes. 50c to \$2.50
Fitted Bags and Suit Cases For Ladies and Men We carry a full line of fitted goods for both ladies and gentlemen and invite you to see our stock. All at Factory Clearance prices. \$2 to \$5.50	Sheepskin and Skiver Leather Club Bags In tan or brown. Four models and each model in three sizes. \$2 to \$5.50	Cowhide and Walrus Leather Club Bags Twenty-four different models, and each model in three sizes. Made in smooth cowhide, smooth grain cowhide, long grain cowhide, real walrus, embossed walrus, etc. Colors black, brown, tan. \$2.50 to \$21	Deep Club Bags, Riveted Frame, Leather Seven different models, and each model in four sizes. Made in crepe grain sheep, smooth grain cowhide, etc. Colors black, brown or tan. \$3.50 to \$10	Deep Club Bags, English Sewed Frame, Leather Twenty-two different models, and each model in three sizes. Made in crepe grain sheep, smooth grain cowhide, hornback alligator and other fine leathers. Colors black, brown, tan and amber. \$8 to \$31	Combination Bag and Case Five models in two sizes. Made from cowhide and real walrus. Colors black, brown or tan. Solid brass trimmings and leather lined throughout. \$8 to \$30	Kit Folding Bags Three models, and each model in four different sizes. Cowhide, Buffalo and real Walrus. Colors black, brown and tan. All lined, with pockets, etc. \$15 to \$36
Suit Cases, Leathered Cloth Seven models, and each model in three sizes. Steel frame, brass trimmings, with printed paper lining. 75c to \$3.25	Suit Cases, Fibre Six models, and each model in three different sizes. Brass trimmings, straps, inside top straps. Color, brown. \$1 to \$7.50	Suit Cases, Matting and Cane Eight models, and each model in four different sizes. Have steel frame, brass trimmings, straps. \$1 to \$7.50	Leather Suit Cases Thirty-seven different models, and each model in two different sizes. A line of cases that you cannot duplicate in the entire south. \$3.50 to \$32	Ladies' Suit Cases Nine different models, and each model in two sizes. Made in long and crepe grain. Sheep, smooth and seal grain cowhide, and real walrus. Colors black, tan or brown. \$5 to \$26	Bellows-Top Suit Cases Six different models, and each model in three different sizes. All made of oil or smooth grain cowhide. Colors black, tan or brown. \$8 to \$20	Ladies' Hat Trunks Fibre and canvas covered. \$5 to \$25
Ladies' Combination Hat, Shoe and Shirt Waist Trunks. \$10 to \$20	Steamer Trunks Twenty-five models. Each model in four sizes. \$4 to \$20	Small Suit Cases, 14-16-18-20 Inches Eleven different models and each model in four different sizes—14, 16, 18, 20 inches. These are made of all the approved materials, from leathered cloth to real walrus... \$1 to \$16 We have been in the business of making trunks, bags and suit cases for forty years—nearly half a century—and our growth has been founded on "THE RELIABILITY OF ROUNTREE." You will get some idea, from the trunks, bags and suit cases listed above, of the immense stock that we carry—of the variety of the lines that we manufacture and sell.	General Purpose Trunk Fibre covered. Sixteen models. Each model in five sizes. \$9 to \$25	Fibre Skirt Tray Trunks Six models, and each model in sizes of 36 to 44 inches. \$10 to \$25

In the Interest of the Consumer

*Not an Announcement,
but a Statement of Facts*

Yes! We have *Doubled* and *Re-Doubled* and are again *Re-Doubling* our manufacturing facilities and our production.

Yes! This greatly increased production enables us to purchase materials at very low prices.

Yes! Factory organization, special machinery, large capital and intelligent direction all contribute to low cost.

But! The above is not alone sufficient for radical price reductions for 1916.

What Then is the Real Reason?

Listen:—For years we have devoted our time, our energies and our best thought to the manufacture and refinement of "FOURS." We know "FOURS." We believe in "FOURS." We are prepared to build "FOURS"—the safe, simple, cheap to operate, thoroughly tried and proven CHEVROLET (VALVE-IN-THE-HEAD) "FOURS."

In the interest of the consumer, we recognize the fact that the retail dealer must work on a narrower margin, the distributor must work on a much narrower margin, and the manufacturer

must work on a very much narrower margin, enabling the consumer to secure for himself an honest and serviceable car at so near 100% value (figured dollar for dollar) that he may no longer be submitted to the violent shrinkage in value of his car when the "announcement period" arrives, which so unfortunately comes in the very middle of the natural driving and riding season.

The above frank statement and the effort to meet the conditions are the most real reasons for our 1916 prices—and note, *the cars have not been cut a single hairline in quality.*

(Contest handled by Providence Tribune.)

OUR COUNTRY— BY OUR PRESIDENT

Continued from Opposite Page

Disseminated had sordid damaging reports about the colony, not only telling of the sore straits it was in to live, but also declaring that Mr. Winthrop and his people had openly repudiated the Church of England and turned separatists, like the people at Plymouth. It was difficult to quiet these reports, because they were practically true. They tried to explain away their novel proceedings when they wrote to persons of influence at home; they tried to persuade even themselves that they were not separatists, not only a distant and necessary consequence of the fact that great church some day assume, but they were, in fact, founding a separate establishment, with a separate authority of the mother church altogether.

Virginia had slowly grown to population of five thousand while the Puritans organized their company and transported it to America. They had themselves very much as Englishmen did everywhere. There was nothing peculiar about them except their hardihood. They were not and their knowledge of how life was to be managed and set forward in wilderness. It had not made much difference among them that the Virginia company was dissolved and the colony put into the hands of the king. Virginia wished their individual rights to be left untouched. They watched their government narrowly to see that it did not impose upon them; but their life went well enough, and they were not displeased to receive changes either in church or state.

The king and his ministers over the company made its colony a stronghold for the restrictive Puritans. The temper of the government grew harsher and harsher during those first years of settlement at the bay, and became more and more tyrannical in its management of the colony, and in its treatment of the king's subjects. Now he was backing the king's inalienable right of the crown, and pitiless attempt to clear the church of all Puritanism, non-conformity, and separatism. The king's subjects at Massachusetts gave him enemies, and complained very hotly that it was filling up with persons openly hostile to the king's policy. The king's subjects at Massachusetts connected with the old council for New England, jealous of the power of the company at the bay, with its independent royal charter, easily persuaded the all-powerful archbishop, and through him the law officers of the crown, to take steps to destroy it. In 1629 the king's judgment was obtained against the Massachusetts charter. In the court of King's bench, the government of the colony was declared transferred into the king's hands, as the government of Virginia, and the Massachusetts charter was annulled. The king's subjects at Massachusetts were authorized the dispatch of a governor and council, to be accompanied, if necessary, by an armed force.

THE PROVINCE OF MARYLAND.

It was a thing for statesmen to take note of, and all to wonder at, that the Englishmen of all sorts and creeds began to think of America, and to desire homes there. When once it had become evident that Virginia and Plymouth were certainly permanent and profitable colonies, the Englishmen of all sorts and creeds began to think of America, and to desire homes there. When once it had become evident that Virginia and Plymouth were certainly permanent and profitable colonies, the Englishmen of all sorts and creeds began to think of America, and to desire homes there. When once it had become evident that Virginia and Plymouth were certainly permanent and profitable colonies, the Englishmen of all sorts and creeds began to think of America, and to desire homes there.

The nation darkened at sight of these things, and no thoughtful Roman Catholic could think of toleration to those who would not tolerate him. The nation darkened at sight of these things, and no thoughtful Roman Catholic could think of toleration to those who would not tolerate him. The nation darkened at sight of these things, and no thoughtful Roman Catholic could think of toleration to those who would not tolerate him.

His colonists reached their new home in Maryland, and found a little stream which emptied itself into the bay. The mighty Potomac, flowing silently between the wide banks there in the lonely wilderness, made a narrow way for the first settlers. The Thames, compared with it, they called a "little stream." It was this broad and stately river, separating them from Virginia, which was the main reason why they called it "Maryland," in honor of the queen, who was the first to give the name to the colony.

against any starving time such as there had been at Jamestown, or any straining to live and make a beginning. The nation darkened at sight of these things, and no thoughtful Roman Catholic could think of toleration to those who would not tolerate him. \$985

HOLLIER \$985 EIGHT \$985

Of the many advantages of the eight-cylinder over any other type of motor, perhaps those which stand out most prominently are the smooth, gliding motion of the car when driving and the remarkable flexibility of the assembled product.

With no other type of motor are you able to derive the same smooth, even driving results, irrespective of road conditions.

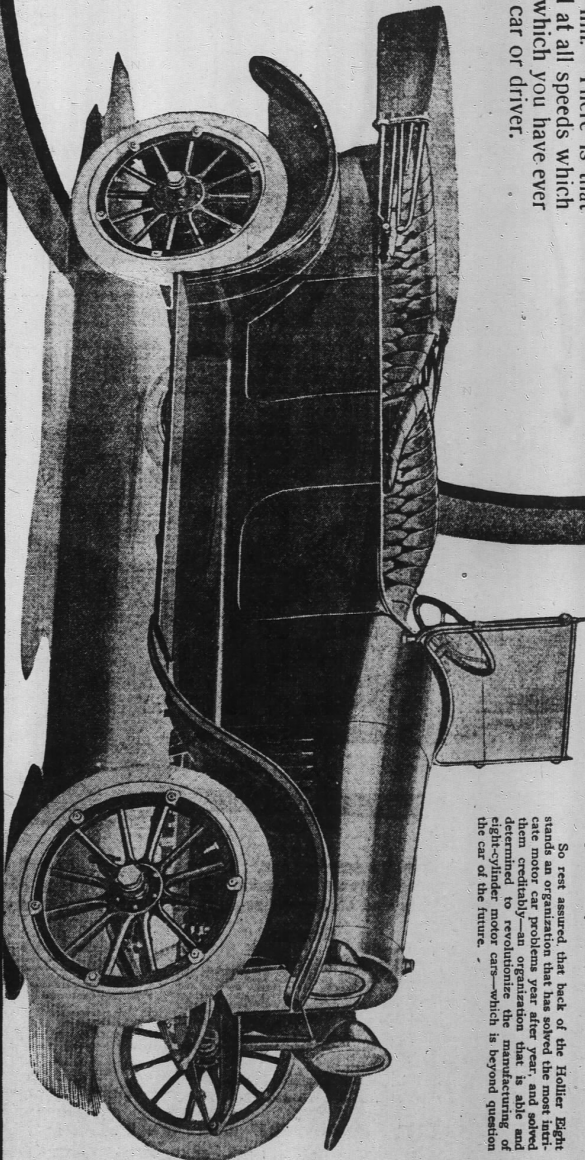

In driving a "Hollier Eight" it is seldom necessary to change gears, whether crawling through crowded traffic, plunging through the heaviest sand, or speeding up the steepest hill. There is that continuous, even flow of power on all roads and at all speeds which provides you with flexibility beyond anything of which you have ever dreamed—with no apparent effort on the part of car or driver.

The "Hollier Eight" is particularly remarkable for its flexibility, its silent action, its freedom from vibration, its ease of control, its accessibility, its ability for continuous running on high gear, its reserve power, its economy of maintenance and its wonderful oiling system.

It is made complete in the factory of

The Lewis Spring & Axle Co.

Some Desirable Territory
Still Open to Live Agents

YOUR ASSURANCE of a PRODUCT WELL MADE

For more than 15 years the manufacturers of the Hollier Eight have specialized in the production of high quality vital motor parts—such as motors, springs, axles, transmissions, etc.

The wonderful manufacturing experience of these fifteen years, together with the remarkably efficient engineering corps we have drawn together, have most to do with our ability to produce such a car as the Hollier Eight at such a price.

You get in the Hollier Eight full benefit of years of costly experimentation and development, but you don't have to pay for it.

Not have we drawn upon our past experience only to the extent of proper development, but in the determination of producing a product that has stood the test of our practical experience.

So rest assured that back of the Hollier Eight stands an organization that has solved the most intricate motor problems year after year, and solved them so efficiently that the motor is able and determined to revolutionize the market for eight-cylinder motor cars—which is beyond question the car of the future.

How Uncle Sam's Young Man-o'-Warsmen Are Put Through the Rigors of Actual Land Fighting at the Great Lakes Naval Training Station—The Pictures on This Page Show a Mimic Battle Fought on a Moment's Notice on Secret Orders From Washington

ON THE day that President Wilson sent his historic message to Germany, a freckled lad of 17, clad immaculately in the uniform of an apprentice seaman, clung his legs from an old Spanish torpedo, and, with half-closed eyes, tried to reason what it all meant.

The imperial government might comply with the demands of the note, issued the sailor boy. And then again she might not. If she chose the latter course—

"Gee," said the freckled apprentice to another Jackie who had swung his legs over the torpedo, "I wonder what warship they'll stick me on."

"Dunno," came the reply. "Makes no difference to me, so long as it's got lots of guns."

All Feel the Same.

That was the way every sailor at the Great Lakes naval training station felt about it. If it was to be war they quite agreed with President Wilson that "the

Jackies in a Charge Such as Took Place at Vera Cruz. The Illustration in the Circle Shows How Wigwagging Is Used to Keep an Advancing Column in Communication With Other Forces.

On board each of our warships are three-inch artillery pieces that can be brought to shore and used effectively when occasion demands. Duplicates of these guns are kept at the four naval training stations of the United States, and the Jackies are instructed in their use. Also they are given rifles and taught how to handle and fire them.

The sham battle in question, which furnished an excellent example of the thorough practice given the apprentice seamen, took place on the grounds of the Great Lakes station at Great Lakes, Ill. The artillery, with riflemen in reserve, were encamped on a steep embankment—supposedly an advantageous position in the mimic conflict. The attacking party consisted of Jackie infantry.

Preparing for Action.

Previous to the beginning of hostilities Jackies climbed high into trees and "wigwagged" signals to their respective commands. As the infantry, bent on storming and taking the hill, came within range of the artillery a fierce cannonading began. Each Jackie who manned the guns knew just what to do. Some loaded, some cared for the ammunition boxes, while others attended to the firing.

When it seemed to the warrant officers and petty officers in charge of the artillery

officers designated who should be dead and who should be wounded. Their object was to give the hospital corps stretcher drill and training in the elements of first aid. Especial attention was given to bandaging, application of splints and transportation of the wounded under difficult and trying conditions.

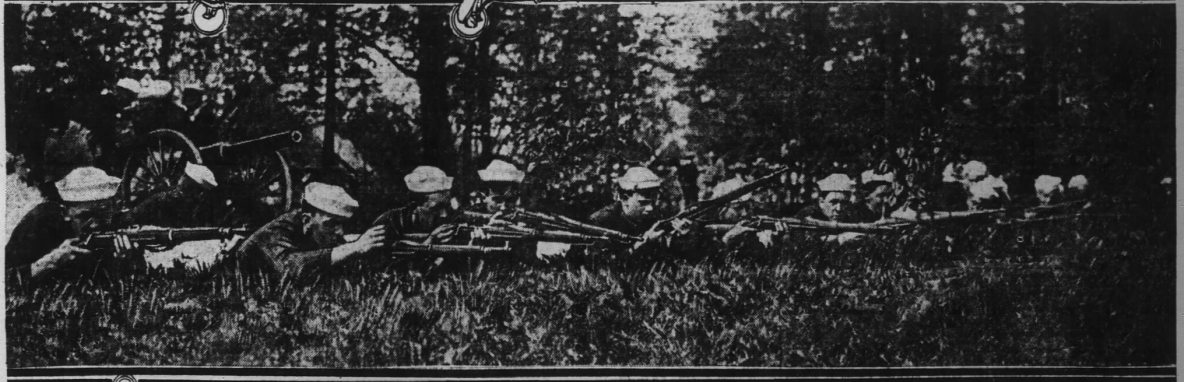

A Wonderful Sight.

"It was a wonderful showing," said William A. Moffett, commandant of the station. "Our lads are as good fighters on land as they will be at sea."

The recruit, who is known as an apprentice seaman, is given an outfit of clothing on his arrival at a training station, and then is ready for instruction. From the start he is taught that neatness of person and clothing is a requirement that the navy exacts from every man. He is given a hammock and taught how to sling it, how to lash it neatly and handily. Inasmuch as the hammock is his bed, to say "lashing his hammock" is equivalent to saying "making his bed."

The second lesson of the recruit consists in learning how to swim. For this purpose a fine swimming pool is provided at each training station.

In the drill hall the sailor-to-be learns to "box the compass." For this purpose a big compass is painted on the wall, in exact

Where Every Shot Tells—Bluejackets Are Shown Here in a Formation in Which They Have Acquired the Greatest Proficiency.

mission of America is the only thing that a sailor or soldier should think about; he has nothing to do with the formulation of her policies; he is to support her policy, whatever it is."

The day following the conversation on the old Spanish torpedo the freckled Jackie, along with

several hundred other man-o'-war-men in the making, received an order to prepare for sham battle. Whether it was a coincidence that such should occur pending the outcome of the crisis, or whether it was a direct means of acquainting the Navy Department of their fitness in the event of war, the future seamen did not know. In fact, it was not for them to ask the reason why.

How Fighters Are Trained.

It shall not be the object of this article to describe the sham battle. Many of like character have been fought before. Besides, one has read of so much real warfare of late that to set forth in detail this mimic series of charges, flank movements and retreats would perhaps fail to stir the imagination or be rewarded with a thrill. Rather, the purpose shall be to show how the future fighters in our navy are trained to meet any emergency that may arise.

One of these emergencies is a battle on land. Bluejackets of our Atlantic fleet were the first to set foot on Mexican soil during the occupation of Vera Cruz, and how well they conducted themselves in the face of snipers and others is a testimonial to the efficient drill they received in sham battle under the expert eyes of officers.

that a repulse of the attacking party was impossible, orders to retreat and "dismount the guns" rang out above the roar of battle. The reserve riflemen rushed to the brow of the hill as the artillery backed away and engaged the enemy at close quarters. The latter was even then climbing up the embankment. The part played in the battle by the reserves was important, inasmuch as rifle fire was more effective at this juncture, and it gave the artillery time to carry out its orders.

About fifty yards from the edge of the hill the command to dismount the guns was already being carried out. It consisted in taking them apart, rolling the wheels away and rebarreling the mechanical apparatus useless to the enemy.

Severe Training Here.

Such was the training given to those defending the fortified position. As severe practice meanwhile was being meted out to the attacking force. These Jackie infantrymen were shown how to make their victory all the more glorious and worth while by executing a flank movement, which resulted in the capture of the reserve riflemen who so gallantly had covered the retreat of the artillery.

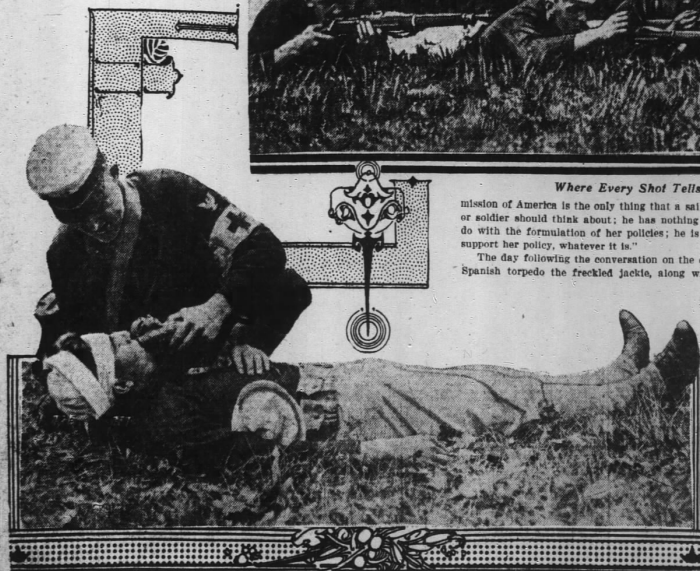

Throughout the engagement unprying

representation of the compass on board a man-o'-war. There is a "log" and a "lead line" where he can learn the "marks" and "depths," and there are stages out on the breakwaters near by where he is shown how to "heave the lead," how to make knots, to splice ropes, to make bitches and bowlines, to coil down gear, and to make himself a handy man about the decks—all these are taught him in the model-room and rigging loft.

Other drills are begun by the recruit after he has been assigned to a battalion. He is instructed in the use of the semaphore (signaling with arms); how to "wig-wag" (signal with flags), and the meaning of lights, or rockets, and other night signals. A rifle is given him, and under warrant officers and petty officers he is shown how to use it in manual of arms and target practice.

The course of instruction lasts about three months, during which time the apprentice seaman receives \$17.00 a month. At the end of that time he is examined, and if he qualifies he gets a rating and goes aboard a man-o'-war with an advance in pay.

It is the gradual development of the landman into a sailor.

Reviving a Fallen Comrade—No U. S. Man-o'-Warsman Is Ignorant of the Rules of "First Aid."

Wonderful Showing Is Made By the Maxwell in Georgia

Maxwell 1915 models are all sold in Georgia and South Carolina. Jim P. Headley, Jr., district salesman of the Maxwell Motor company, brought the news to the Atlanta Saturday that during the past three weeks he and his crew had completely exhausted the stock of the Atlanta warehouse.

The record of Headley and his salesmen, however, is not exceptional. The entire state of Georgia and nearly all of South Carolina are now a network of earnest, enthusiastic Maxwell dealers.

Production of the 1915 Maxwell has been suspended during the announcement of the new 1916 model which will be made shortly.

H. H. Howe, sales supervisor of Zone Two of the Maxwell Motor company, in a message to J. P. Headley, of the Atlanta headquarters, expressed his gratification of the wonderful showing made by Maxwell in the states of Georgia and South Carolina.

The zone which Mr. Howe has jurisdiction comprises the Atlantic coast states and those adjoining to the west, and in his opinion the prospects for future business in the territory under the control of Headley are splendid.

He frankly states that it has been shown through the cars and the successful work of Headley and his associates that the south wants motor cars if those cars represent the ultimate in value for the money asked. Mr. Howe is an able expert of automobile sales—one of those who direct their men with the experience gained in long years of service. His knowledge of motor car values is profound and his selling abilities are only eclipsed by his accurate diagnosis of the caliber of men under his direction.

The Maxwell company has made great strides since its reorganization and it is whispered around the ranks of motordom that even greater things will come from Maxwell in the near future.

H. H. HOWE.

JESS WILLARD BUYS STUDEBAKER MACHINE

Visit of Champion to Factory
Creates Sensation Among
the Employees.

Jess Willard, champion heavyweight pugilist of the world, now drives Studebaker automobile. He bought it while in Detroit with Miller Brothers' 1st Ranch Wild West show.

Incidentally, the champion smashed all office discipline at the Studebaker factory when he went out to get his car. When word was passed to the office that he was a visitor, all work ceased. Every man present wanted to see the pugilist who had transferred himself from a white hope to the white reality. Soon the employees were waiting a path past the office where the champion was talking to some of the officials of the company. In ten minutes the path had become a throng, and in five minutes more it looked like a board walk at Atlantic City on Easter Sunday.

Everyone looked through the glass partition at the champion. At last the pugilist was hailed by official order. The redoubtable Willard was no longer subjected to the admiring glances of his countrymen and also of his pretty women, who had come from the stenographic department. However, the men who deflected the current of curious pedestrians had just as much to see as the women.

Meanwhile Willard was busy in purchasing a six-cylinder touring car. It was delivered to him in the afternoon at the showgrounds by a chauffeur whom the champion employed while in the city. The chauffeur will probably do most of his driving while the champion is on tour. For the pugilist insists on taking the wheel himself while in the metropolis. Mrs. Willard caught the fever at once, and has announced that before a week had passed she also would be driving the car.

Willard fell in love with the 1915 Studebaker while training for his fight in Cuba. The Havana representative of the Studebaker placed a car at his disposal while he was there, and the white hope rode to the fight and returned to Havana the champion in a Studebaker car. At that time the pugilist was not in a position to buy a car. As Tom Jones, his manager, remarked while at the factory with him: "We had all our diamonds soaked, and although we have since got them out, they are still damp from the experience."

Mr. Jones still manages the affairs of his cowboy protegee, and assisted him in picking out his new Studebaker. The champion did not forget the promise he made himself to get a car, and as soon as the weather permitted, which happened while in Detroit, he secured one from the factory through the local retail branch.

The automobile is carried with the circus on a flatcar, and on arrival at each town it is run off at the sliding platform in front of the show grounds. In which Mr. and Mrs. Willard and Mrs. Jones are traveling. The champion is a lover of outdoor life, and most of his time away from the circus is being spent in his new machine.

MANY VICTORIES WON BY HARLEY-DAVIDSONS

Reports of Successes Come
From Every Section
of the Country.

Telegrams received by Harley-Davidson Motor company from all parts of the country announcing the clean-ups in races over distances of from 2 miles to 200 miles, prove convincingly that the Harley-Davidson has made good the repeated claims of William Harley of building the fastest unporting machine in the world today.

From Salt Lake City, Harley-Davidson won first and second in a race of 200 miles, beating out nineteen other starters. When the race was over, Harley-Davidson won four out of five races. In Phoenix, Ariz., Joe Walters on a Harley-Davidson in the 100-mile race covered the distance in three hours and seven minutes, and Harry Crandall came in second. In the 50-mile race, Harley-Davidson beat Walter de la Motte by eight seconds. Walter de la Motte, who was considered one of the best motorcycle racers in the world, also lost to Harley-Davidson. In the 100-mile race, Harley-Davidson beat Walter de la Motte by eight seconds. Walter de la Motte, who was considered one of the best motorcycle racers in the world, also lost to Harley-Davidson.

The fact that Joe Walters and Crandall did not touch a tool to their machines for the entire distance and that Harry Crandall, on his Harley-Davidson, made his first 100 miles in ninety-two minutes and thirty-five seconds, beating the world record, led by Walter de la Motte, by four minutes, bears out the remarks of Joe Walters, made at the Savannah Grand Prix race last fall, that the Harley-Davidson certainly had the "hump." The performance in the motorcycle racing world is considered marvelous—that an unporting machine should make such wonderfully fast time and defeat 16-valve ported machines, beating what are considered the best riders in the world.

In Portland, Ore., on the same day, Harley-Davidson cleaned up everything,

beating the best riders on the Pacific coast using 8-valve ported machines, while Harley-Davidson was regular stripped stock unporting models. At Topeka, Kan., Ray Weisbar won first, Cooper second and Hart sixth position in a 100-mile race, defeating 4-valve singles and five other ported singles. This race was on a half mile track and Harley-Davidson 20-50 singles were used by the riders against the riders on other makes using 4-valve singles and ported singles.

This opens an area to a new field of superiority in the racing game for Harley-Davidson, as they have only very recently put out the fast racing single and the wins of Weisbar and Hart prove that the Harley-Davidson has put the right dope on this. Coming closer to the south, on December 31st at Knoxville, James A. Trent, on a Harley-Davidson won two races, five 10-mile events, tying the track record, defeating fast special machines of other makes sent there for that purpose. The headlight dimmer and Harley-Davidson are conclusive of Harley-Davidson speed and staying qualities.

PRICE OF OVERLAND REDUCED THIS YEAR

Largest Four-Cylinder
Machine Will Sell for \$750
This Season.

A big sensation in automobile circles this year is the cut in the price of the Overland.

The largest four-cylinder Overland produced this year will sell for \$750. Specifications show that, better in many particulars it is otherwise practically the famous Overland Model 80, which last season sold for \$1,075. It is lighter in weight, has more power, an improved starting and lighting system, and a headlight dimmer and a new upholstery.

The reason for the low price is directly in line with the Overland policy of economy. The headlight dimmer, saving accomplished by the wonderful facilities of the Toledo factory. Six years of preparation and development of these facilities have brought the Overland company to the point where they can offer a real family car combining road comfort and economical operation for the low price.

John N. Wilby, president of the company, stated a month ago that the make possible a daily output of 400 cars, or double that which gave him company first place in the records of the automobile chamber of commerce.

Overland officials declare that it is only the economies of such a tremendous production that enable them to establish a price for their product which is so revolutionary.

Model 81, as the new Overland is known, is a large touring car, with a body roomy enough to seat five grown persons comfortably. In power, finish, comfort, equipment and construction, it is fully the equal of its predecessor.

The 35-horsepower motor is exactly the same as that of last season's large Overland four, and in view of the car's lighter weight the surplus of power is even greater. Its cylinders have a bore of 4 1/8 inches and a stroke of 4 1/2 inches. Excessiveness of Overland owners during the past year have known the proportion of power to weight to be ample for all purposes.

The body also is like that of last season's Model 80, conforming to the very latest notions in streamlining design. As in the former model the shell of a single stamping which gives the car a complete unit appearance. The exterior of the car is entirely smooth. Frame, running board brackets and battery box are concealed by the running-board shield, and crowned fenders of heavy gauge steel add materially to the appearance of the car. Concealed door hinges and inside handles carry out the smooth effect.

The seats are roomy with high, comfortable backs. The divan upholstery cushions are built on deep, resilient coiled springs while the covering is of the new leatherette material, which recently has become so popular because of its wear and comfort. This upholstery is trimmed with leather.

**CARL FORT WILL
HANDLE "KING"
AS LOCAL AGENT**

Friends of Carl Fort will be pleased to know that he has been selected as local agent for the Harley-Davidson Motor company. Mr. Fort has had for some time the Harley-Davidson Motor company, which he has been handling for the Southern Tire and Rubber company. Mr. Fort has had for some time the Harley-Davidson Motor company, which he has been handling for the Southern Tire and Rubber company. Mr. Fort has had for some time the Harley-Davidson Motor company, which he has been handling for the Southern Tire and Rubber company.

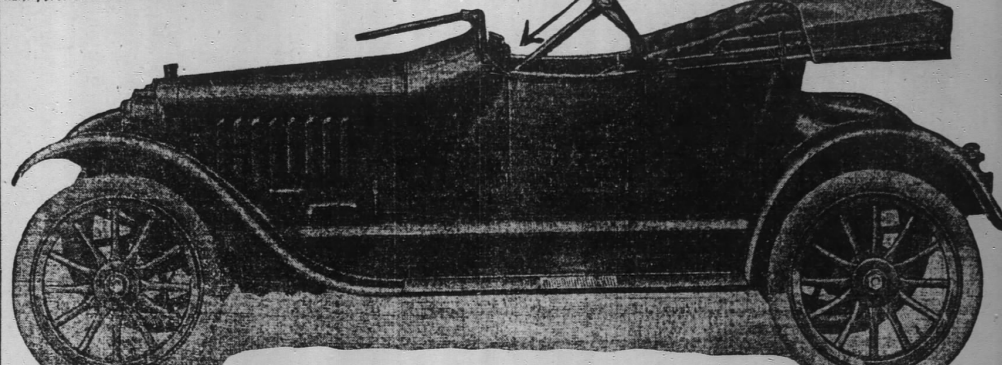

THE REMARKABLE GROWTH OF THE SAXON FACTORY

In less than 14 months the Saxon Factory has increased more than five times its original size, and with the increased facilities is turning out **one complete car every five minutes**, and still growing. But even with these increased facilities the demand is far in excess of the supply.

There's a Reason

New improved body, genuine streamline effect—identical in style with high priced two-passenger cars. Wood or wire wheels. Electric lights and starter, \$70. Standard or 60-inch tread.

GASOLINE GAUGE
& FILLER PLUG

\$395

What it Costs to OWN One

SAXON

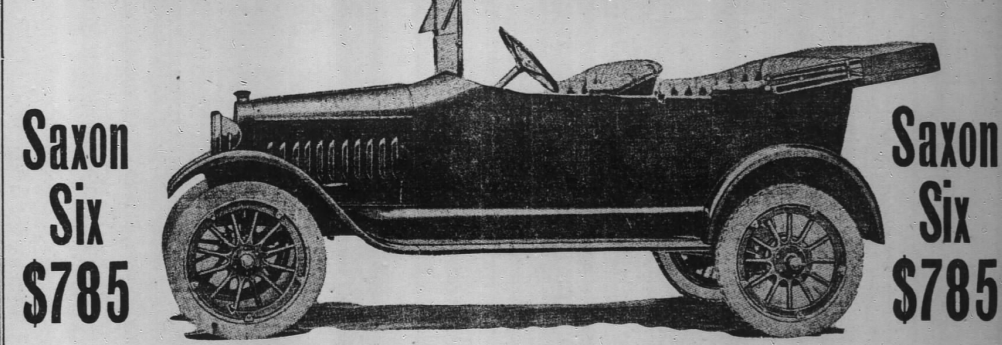

The Car That Makes Both Ends Meet

The first cost of the Saxon places this sturdy car within the reach of every one. Its price is \$395. Owners are amazed at the economy records of their new Saxons—25 to 35 miles per gallon of gasoline, 75 to 100 miles per pint of oil; 3,500 to 5,000 miles on a set of tires. Saxons average half a cent a mile in operation cost—one-fourth of a cent per mile passenger—and will stand up. Think of the price—\$395.

1/2 cent per Mile

What it Costs to RUN One

The "Saxon Six" \$785

Here is certainly an ideal car for those who want a touring car. A five-passenger, six-cylinder Saxon is truly an unusual value. Plenty of room, in no sense a small car, having 112-inch wheel base, 32x3 1/2-inch tires, 30-35-horsepower, high-speed motor, electric lights and starter as regular equipment and many other unexpected features. Here are the specifications:

- MOTOR**—Six cylinder "L" head cast en bloc; 30-35 h. p.
- COOLING**—Thermo-siphon, pump circulation, leads to main bearings
- VALVES**—Nickel steel head, carbon steel stem.
- CRANK SHAFT**—Drop forged, special steel, 1 1/2 in. diameter, cam integral, driven by helical gear, four bearings, 4000 R.P.M.
- CLAYTON**—Special drop forged steel, three bearings.
- IGNITION**—Atwater-Kent.
- ELECTRIC STARTING AND LIGHTING SYSTEM**—Gray & Davis.
- FUEL**—Gravity from 10-gallon tank, located in cowl.
- DRIVE**—Streamline, 2-passenger car, 112 in. wheel base, 16 in. deep, floor board to dash 21 in. Rear seat 18 in. wide, 15 in. deep. Front doors 18 1/2 in. rest 21 in.
- CONCEALED MIRRORS**
- COLOR**—Richelieu blue, running gear black.
- CONTROL**—Left-hand steer, center control, throttle and clutch, center of steering wheel, foot accelerator.
- TRANSMISSION**—Selective type, three speeds forward, and reverse; mounted on rear axle. Hystat roller bearings with ball thrust back of adjustable drive pinion. Gears and shaft special alloy steel.
- DRIVE**—Shaft drive, 1 in. alloy steel, double universal joint, concentric torque tube.
- CLAYTON**—Multiple disc, dry plate, steel on raybestos.
- STEERING GEAR**—Worm and gear type, 11 1/2 in. wheel.
- DRUP**—Forged, heat-treated steering connection.
- BRAKES**—Two sets on rear wheels. Service brake, external contracting, 10 in. diameter, 2 1/2 in. face. Emergency, internal expanding, 9 3/4 in. diameter, 2 1/2 in. face. Both brakes lined with thermoid.
- FRONT AXLE**—Single piece drop forging, I-beam section.
- REAR AXLE**—Three-quarter floating. Pressed steel housing. Two pinion differential carried on Hystat bearings. Ball thrust. Main drive shafts 1 1/2 in. diameter, roller bearings. Rear wheels carried on Hystat roller bearings.
- SPRINGS**—Cantilever front and rear. Front springs 27 x 4 in. long, rear 38 in. long. Both springs 2 in. wide. Vanadium steel.
- TREAD**—Standard or 60 in., optional.
- WHEELBASE**—112 in.
- WHEELS**—12x16 in. Wood—best grade hickory—with demountable rims.
- CHASSIS**—Pressed steel—channel section—14x1 1/2 in. in.
- EQUIPMENT**—Electric lighting and starting system, two head lights, dash light and tail light; extra man top; windshield; horn, speedometer; extra tire; tire irons; tools and jack.

The Housekeeper's Council Table

Conducted
by
Dorothy Dolan

With the Daughters and Mothers

By DOROTHY DOLAN.

THE wise mother takes cognizance of birthdays and other family celebrations. If rightly handled, they mean so little in increasing the family expense and they contribute much to the home life and family happiness.

A home that is worth while means much more than a place for shelter and a common storehouse for food. It is the source of social life, love and justice. When every home breathes and thrills with the pure air and warmth of love and joy there will be little combat and hatred in our larger social relations.

Here is a vital point at which woman's social influence counts for untold good. Though she wishes her influence to count in the broader social sphere she must begin this work in her home at her own hearth. If she hopes to have her daughters grow into flowers of splendid womanhood she must water the soil with plenty of love and thought.

There is no time at which she can dedicate her love to her children better than when they are to be graduated from one school to another, such as from grammar school to high school, or from high school to college. These are important milestones in the lives of your children, and if they are approached rightly they are an endless source of good.

We often hear mothers say shortly before such occasions: "I really should like to give my daughter a party or a luncheon, but I do not feel that I can afford it. You see, I want to get her a handsome graduation dress, flowers and a personal gift."

Artificial Flowers.

That may be true enough, dear little mother, but if you were to invest in a simple dress and modest bouquet of flowers and omit the present, by taking a little ingenuity and thought you can plan an appropriate luncheon or evening party at small cost.

If your daughter is to be graduated from the grammar school she is still a little girl, and the luncheon table should be in keeping with her years and those of her friends. The table colors along with the floral decorations may either be white marguerites, marguerites and buttercups, or daisies. If your daughter is grown and is to be graduated from high school or college pink or white roses will be suitable.

A charming table can be done in white and yellow in some such way as the following: The center of the table is ornamented with a large, low mound of marguerites or marguerites mixed with buttercups. If you make your own centerpiece it is arranged somewhat more readily by piling the flowers in a large, shallow basket. The handle of the basket can be trimmed with white or yellow ribbons and a few natural flowers.

Dress and Flowers.

You can carry out the floral idea by trimming the salad dishes, the bonbon and candy dishes and even the candlesticks with artificial paper flowers to match your natural ones. The place cards can suggest this floral idea further by using a white card ornamented with a buttercup or daffodil stamped in gold. With a little thought you can suggest the color scheme of white or yellow in your menu.

WHITE MENU.

Cream of Chicken Soup.
Broast of Chicken.
Endive Salad. New Potatoes.
White Patties. Marshmallow Cake.

GOLDEN MENU.

Grape Fruit or Orange Cap.
Tomato Soup.
Fried Chicken.
Asparagus, Hollandaise Sauce.
Boiled Carrots.
Orange Ice. Small Cakes.

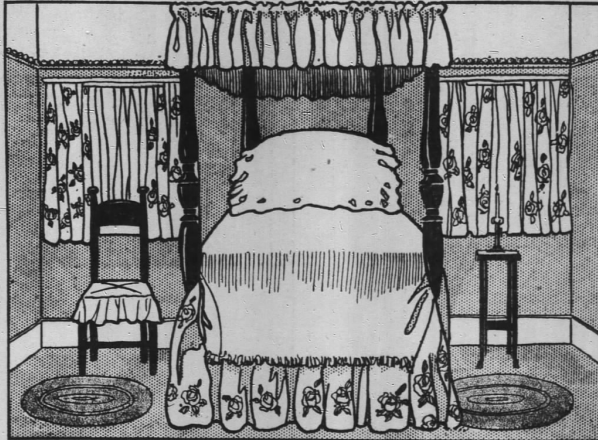

The white or rose table is more suitable for older girls. A dozen lovely white or pink roses will go a good way if they are placed in a small Japanese garden centerpiece. The bouquet or the fruit can be served in cups and glasses covered with paper flowers. The table can be further beautified by radishes cut into the shape of roses, and the nuts and bonbons can be served in large or small baskets fashioned of paper flowers. Suitable but inexpensive favors can rest at the side of each place card and the favors may be tied with narrow white or pink ribbons.

A Few Suggestions.

A good luncheon dish is made of lettuce, tomato, chicken, and a dressing through the chopper. Put in a baking dish with layers of boiled macaroni, with the top layer of bread crumbs.

Cayenne pepper is excellent to rid cupboards of mice. The floor should be gone over carefully and each hole stopped up with a piece of rag dipped in water and then in cayenne pepper.

GREEN and white for a color scheme is especially grateful for such a room as this if the room has a southern exposure. The appearance of a room so decorated is always pleasing, even when the mercury soars high. These colors may be relieved, however, by a bit of pink dimity for the bed valance.

Home Decoration and Furnishing

By MADAME MAISON.

SHOULD you have an old fashioned four poster bed do try to carry out the rest of the room in keeping with it; you have no idea how delightful it is to work out certain effects.

Now we will suppose that you like green and white for a color scheme, which is especially grateful if the room has a south exposure, for its appearance is always cool and pleasing even when the mercury soars high. To relieve the green and white add a bit of color select a dainty pink flowered dimity for the bed valance and ruffs around the top. Keep the coverlet white with knotted fringe and perhaps you have or can have made a chrocheted spread.

Use the same dimity for over drapes and have the under curtains of dotted Swiss or plain white muslin. Place a candle stand at one side of the bed and a straight high-back chair at the other with a cushion and valance of the dimity, and you will want a little cane seated rocker or rather one done with rushes and covered with cushion and valance.

On the floor have either braided or woven rag rugs in green and white with a border of pink, and I assure you this room will be one in which to have pleasant dreams. Of course there should be a large bureau, with a mirror and a chest of drawers with a toilet glass on top.

Call it grandmother's room. But I almost forget most of our modern grandmothers never even saw such a room much less had one unless they have this furniture as heirlooms. The illustration shows how to drap the bed, the braided rugs and how to do the chairs.

TO THE READER:

This page is for you. If you want help on any of the household or domestic questions that constantly arise, write to the experts whose names appear here. It will be freely given.

color would you suggest; the roof is just natural shingles and must remain as it is. JAVE.

How would you like colonial yellow with white trimmings or a pale gray with green (dark) trim? If you do not think it too perishable I would suggest white with green blinds.

Reply to Betty.

You can make no mistake if you purchase the painted furniture in green, gray or yellow for your porch, as you say white will not do on account of the hard usage it will have. I don't wonder that you are attracted by this fascinating display, but if you have to be practical nothing will give you the service that the hickory sets will, but of course they are not so gay and festive in appearance.

An excellent polish cloth can be made in the following way. Buy an ounce of jeweler's rouge, mix with a little water, rub into a piece of chambray and dry.

Ten jelly can be made just as coffee jelly is and in a very pleasant change. The tea should be freshly drawn and the juice of a lemon used with one-half cup sugar for flavoring.

For Green Dining Room.

Please answer in next Sunday's paper.

What do you think would be the proper color for overdrapes on windows of a dining room the walls of which are green and have two south and one east window and the curtains are ecru voile? B. F. E.

Sorry to disappoint you, but it is never possible for me to reply "in next Sunday's paper," much as I should like to be obliging. This department has a most forward way about getting ready in advance, so when you are in haste just send me a self-addressed, stamped envelope in care of the newspaper and I will send you a reply immediately.

A soft old rose would be good in the green room or a shade of green to harmonize with the walls; best of all I should like a cretonne, linen or chintz with colors of green, rose and wood browns with some tan. This will give color and be very pleasing in effect.

Color for a Farmhouse.

Our farmhouse stands on quite rising ground, but there are very few trees close to it. It is now painted a dark gray and always looks dirty. What color and how to paint it?

Appetizing Menus for Your Sunday Meal

BREAKFAST.

Strawberries and Cream.
Ham and Eggs.
Buttered Toast.

DINNER.

Vegetable Soup.
Roast Beef and Potatoes.
Apple and Nut Salad. Creamed Peas.
Toasted Crackers.
Cheese Pudding.

SUPPER.

Creamed Chicken.
Fried Tomatoes. Baked Potatoes.
Homemade Biscuits.
Strawberry Jam. Tea.

Cheese Pudding—To one teaspoonful grated cheese take one teaspoonful of bread crumbs. Season with cayenne, dry mustard and salt. Place one teaspoonful milk in a saucepan, heat in a few minutes until it is soft. Let cool, and add the yolk of one egg, well beaten. Cream a bit of butter and mix it with the mixture. Put a little butter on top and bake for twenty minutes.

Asparagus Bundles—Scrape the asparagus carefully, wash and tie in small bundles. Put into boiling water with salt and cook until tender. Serve in bundles on a hot dish. Make a drawn butter sauce by melting some good table butter with a little salt. Serve it apart.

Praline Cream—Whip two cupfuls cream with two tablespoonfuls of sifted sugar and about one-half stick of scraped vanilla or one teaspoonful vanilla flavoring. Crush one-fourth pound sugar almonds and six crumbled macaroons. Mix all together. Dissolve one-eighth box gelatin in a small quantity of warm water and beat it in. Wash out a china mold and decorate with glace cherries. Pour in the mixture and stand on ice.

Novelties in Home Entertainment

By DAME CURTESY.

A RECENT bride was the recipient of this very pretty shower, given on the lawn surrounding a beautiful old-fashioned home.

The guests were welcomed on the porch, and then went out on the lawn, which was set with tables and chairs, with rugs spread down. Several huge umbrellas made resting places for those who wished them and there was a bowl of delicious fruit punch with a little slatter of the hostess presiding.

From the branches of trees, large shrubs and attached to strings strung across the lawn there were all sorts of bulky wrapped parcels. A large clothes basket tied with white satin ribbons was brought forth and the honored guest was handed a large pair of shoes tied with white ribbon and told to cut down the parcels, each of which was marked with the donor's name and a sentiment to be read aloud. Many of the articles were accompanied by reliable recipes; for instance, muffins, bread, salad molds, cake tins and pie pans had only and tried family rules attached, greatly to the bride-elect's satisfaction. A delicious supper was served at 6 o'clock, to which the bridegroom and his friends were asked.

Afterward the gifts were all packed in the clothes basket and the happy little honoree was escorted home, amid much merriment.

Daisy Party for Children.

The daisy is procurable nearly all the year round, either wild, cultivated or from the florist, and children love it, so with this in mind the party devised was given. At a paper novelty house large daisies were obtained having just eight petals. The children were given the yellow centers, and the petals were neatly cut off and hidden through the rooms. The child who first found eight petals was given a tube of paste and told to paste them back on the center. These daisies could easily be made at home, cutting the center from yellow cardboard and having the petals at least three inches long. Award a prize to the child who first gets the daisy completed. Then another good stunt is to have them make a daisy chain by giving each child a coarse needle and thread and a big bowl of daisy petals and see who can make the longest chain in four minutes.

"Daisy in the Dell" is an enjoyable game, and is played by forming the children in a circle and having them join hands, then choose one as daisy picker, who runs around the outside of the ring, crying: "Daisy in the Dell, Daisy in the Dell, I don't pick you, I don't pick you, I do pick you."

The player whom the "picker" touches must try to run clear around the circle and back to his place before the daisy picker touches him. If successful he does not have to be "it," but if caught he takes the place of picker.

The refreshments may be made very attractive by having individual cakes with daisies on top made with marigold petals and yellow frosting centers. Stems and leaves are made from angelica. Place cards may have real daisies thrust through the corner of card and serve the daisy in halves of oranges; place holes around the edge of the halves and insert a daisy in each opening. This makes a circle of daisies around the top and the effect is lovely. Orange gelatin capped with whipped cream may be used instead of ice cream.

Questions and Answers.

Reply to "Anxious."

There seem to be several "anxious" readers this week, and I wish I did not have to make any of you wait for answers, but our space is limited and the letters so many that each Sunday I am forced to disappoint some one. You did nothing improper in sending the card to the young man when he was ill. I really think he owes you some explanation of his actions, but men are strange creatures and perhaps for your own peace of mind you had better ask him to come to see you. Then you can have everything fully explained. If he does not come, you can do as you please. I would try to forget all about him.

A Budget of Queries.

Kindly enlighten me on the following: your advice is a great help to all your readers: When just a cup of chocolate or tea is served is it necessary to take it on the spoon or may one drink from the cup? When a lady and gentleman are having refreshments or luncheon together should "he" sit on the opposite side of the table or at her side? If the latter, which side? Who should leave the table first, guest, host or hostess, and does the same rule apply to a crowd of girls who are luncheon together? A GRATEFUL READER.

The cup may be raised to the lips when partaking of either tea or chocolate. It is neither to sit opposite each other. If seated side by side the man sits on the right of the girl, so that he may help serve her with his right hand. The hostess rises from the table first. If there is none, as with a crowd of girls, anyone may make the move to go.

TALKS WITH THE WOMAN WHO WORKS

TWO well-known business men were rushing along the street the other day to catch a suburban train. They were exchanging ideas about various employees, when the elder man, who was as keen as was the younger, said, "I have two women in my office who by way of comparison are very interesting. The one is my secretary and the other is my assistant."

"If I were asked to select a symbol of accuracy, I should pick out my head stenographer. She has been with me a little more than a year and in this time I have dictated to her more than a thousand important letters which found their homes in every part of the world."

"After once dictating the letter I signing my name. I have every confidence that there are no mistakes in any of her letters. Her manner has the same even tempo. She picks up any piece of work I may give her without making any ado. Her assistant is just opposite. She is as bright and energetic as a young colt, and at times forceful."

"She is full of information and helpful ideas and she is as generous with these as she is with her enthusiasm. I need only furnish her with an idea for the most complicated letter and she frames it up well."

"Still I never allow one of her letters to go out without glancing at it or having somebody do it for me. Her ideas come so quickly and her mind works so rapidly that she often lets some slight error creep in without

catching her mistake. It is just this shortcoming that mars her work."

"As a result, this clever worker gets \$25 a week and her superior \$50. If the younger one can ever weed her small inaccuracies, she certainly will be worth her weight in gold."

"Too bad," remarked his companion. "Hardly a day goes by but I see this marked contrast in these two types of workers among our several hundred men and women who are employed by us. On one hand I see a large common average, who can do a certain kind of work very well. They go along day after day at an even tempo, but as soon as I throw them on their own resources they are lost. Because of this, we have vacancies up the line we often have to take a man or woman from the outside instead of one of our number."

"From time to time we come upon the initiative and clever type of young woman you mention. She is usually so quick and enthusiastic she does not realize all work requires care and reflection. The more important it is, the more thought and accuracy are needed. It is only the unusual worker who is conscious of the fact that apparently slight inaccuracies can involve a great loss of prestige and business."

The discussion ended at this point because the two men made a bee line for one of the suburban trains about to pull out. The application of these remarks are worth holding before every man and woman who wishes to become successful in their work.

The great difference between the average and the successful is more often due to this quality of accuracy than opportunity and a difference in reality. Whatever else genius is, it is certainly nine-tenths application. The more talent you have, the more it needs training and reflection.

It takes more time and study to become a good singer or painter than a stenographer or a telephone operator. But even such supposedly common-place work is worth doing well and accuracy is as important for the stenographer and the operator as it is for the singer and the painter.

Because a few stenographers and operators valued this quality along with their initial ability and enthusiasm, they are today holding important places as secretaries and other important clerical positions.

VIVIAN'S Heart to Heart Chat

THE other day a mother and daughter were reunited after five long, weary years of separation. The situation was extremely trying because the young woman was an only child and she was as much in love with her parents as she was with her husband.

Elhel, the girl in question, was in love with this young man for two years. She tried to care for every other man she met except the one she really loved just to please her parents. When she saw that she could not curb her feelings, and told her parents that she must marry the one man she loved or not at all, they consented with a rebuke. During the first five years of her married life her parents treated her as an outcast and would have nothing at all to do with her husband.

Their only objection to the young man was that he had prospects instead of immediate wealth and success. Since they had wealth and a good social standing they felt their daughter was giving more than she was getting. Elhel had no patience with this. She tried to reason with her parents—to show them that since she was to be some man's wife it was far more important that he please her and that she be in love with him than that her future husband win the approval of her parents.

She might have had patience with them if they had any sound reasons for objecting. She could not see why parents of mature years and with plenty of common sense should judge her lover by such superficial standards as his present position. She barked on his future no less than if it were a government bond. How could he fail when he had so much strength, endurance and manly courage?

It was just because she was to have a part in the making or in the marbling of his success that their marriage would be worth while. Then there was just this element of risk, combating with the future that would make them both expend their best energy to win. Her last and strongest argument was picking a husband or a wife was not like selecting a new hat or gown. She remembered that when she was quite young her mother had often helped her select her frocks and hats. She remembered that when she was a child or hat she disliked heartily. As a result she must either make the best of the unbecoming costume or give it away.

No harm was done by these maternal blunders. Elhel and her husband if they only had the love and sympathy of Elhel's parents. While working and making a number of things to make them happy, including a comfortable home, many friends and the knowledge that they were making money for their own.

Still the thing she wanted most was lacked. She wanted her parents to love her as much as they did before she made a mistake. More important still, she wanted her parents to love her husband as much as they did her.

In spite of her wishes and disappointments, it took them five years to meet her parents' requirements. Her husband had to win success and a fortune in addition to his other virtues. These might have had some meaning if those first five years, which should have been happy, had not been filled with heartaches and disappointments.

There are many Elhels and Georges in this world. Young persons whose happiness is marred and blessings turned to disappointments through no fault of their own. It is simply because one or the other does not meet the requirements of the families.

MUCH INTEREST SHOWN IN "THE SIX OF '16"

Atlanta Autoists Have Chance
to See the New Mitchell
Automobile.

"The Six of '16" just announced by the Mitchell factory of Racine, is creating more comment and interest in automobile circles than any new model announced in recent months. "The Six of '16" is now being shown by D. A. Carson, manager of the local branch of this city, and the steady line of visitors looking over the latest creation of J. W. Mitchell presages an even more turbulent demand for this new Mitchell Six than for the Light Six of 1914, which was sold out before the past season had got well under way.

The striking feature of the new model to the casual observer is the remarkable value that is apparent at a glance. While this is a light Six, it should in no way be confused with the average six-cylinder car in its class. The Six of '16 is a real full-sized car—a car of size, beauty and completeness of equipment as would have listed at double the price two years ago. It is readily apparent this car has not been built to meet a price. The manufacturing facilities of the big Mitchell forty-five-acre plant, all its financial resources and the well-known constructive genius of Chief Engineer J. W. Mitchell—who has at five different times in the past fourteen years created a new class in automobile design and value—are expressed to the highest degree in this new Mitchell model.

"The Six of '16." Outside of the price, \$1,550, there is nothing to distinguish this car from those listed up to \$2,000. The 121-inch wheel base, the 42-horsepower motor, the Bate improved coilover springs, the long, clean, classy boat lines and the commodious upholstery—the richness of the finish, the completeness of the equipment, indicate the thoroughness necessary to make possible this remarkable car at the last price.

The Bate two-unit, three-point suspension construction is used as in all former Mitchell models designed by Mr. Bate. This construction is such that either complete unit can be removed from the car without removing the body or disturbing the chassis. The front and rear seats are mounted on a removable standard chassis standard and all the floor boards are quickly and easily removed, leaving the entire mechanism under the hood, which is ordinarily a sealable compartment.

The radiator, accessible, located, is attached directly to the cylinder casting, the intake manifold being cast inside the cylinder block. This arrangement insures a uniform temperature for the gases when entering the cylinders, which improves carburetion and increases the miles per gallon of fuel. The battery is suspended at the side frame member directly under the front seat. Location very accessible on account of the removable feature of front seat.

All the valves and tops of all the pistons are instantly exposed to inspection by removing the one-piece cylinder head, which can be quickly removed without disturbing any other part of the motor.

The Six of '16 Mitchell has a new 42-horsepower, six-cylinder, J. head engine of the high speed—high efficiency type, with long strokes and small bore—insuring the much desired quietness and smoothness particularly valuable in an engine of this class, and the flexibility is demonstrated by eight gear speed of from 2 to 80 miles an hour without vibration.

The engine drives through an acoustically stamped steel one clutch, of ingenious design, and a single universal joint mounted just ahead of the gear set. The gear set gives three speeds forward and reverse, and the shaft is mounted amidships. From here, the drive is taken through hollow drive shaft included in a torque tube, to the full floating rear axle. The drive is left, and the control is centered. The wheel base is 121 inches and the tires are 34 with anti-skid on the rear.

The equipment is complete down to the last detail, including quick-acting two-door, ventilating windshield, a positive-acting, one-man top with quick-acting side curtains, electric driven power tire pump with long hose, and air gauge, speedometer, oil level, color electric horn, license plate bracket, front and rear spare tire carrier in the rear, dimming headlights, tail lamp, combination instrument board and inspection light, wide foot rest, robe rack, package pockets, jack, complete set of tools, etc.

SILVERTOWN TIRES MAKE FINE RECORD AT INDIANAPOLIS

One of the best features of the races was the Silverstown Star, published at the Indianapolis Speedway track, under the supervision of Mr. E. E. Thibault, advertising director of the U. S. Goodrich company.

During the races every visitor and every newspaper man was supplied with a copy of the Silverstown Star. It gave full and complete information about the race and valuable information on care of the tires with pictures of the race drivers and cars. All the cars that finished in addition to the first ten were equipped with so Silverstown tires.

Copies of the Silverstown Star may be had at the Goodrich branch in this city or by mail from the U. S. Goodrich company, Akron, Ohio.

A leading race driver stated that 99 per cent of the credit for his first and general all-around efficiency was due to Silverstown tires. 25 per cent to the condition of the track and 24 per cent to increased motor efficiency.

Every Silverstown tire in the race was bought and paid for by the drivers and so free lines nor money prizes were offered. This record is without parallel in racing history. Other drivers endorse a tire so unanimously as these drivers endorsed Silverstown.

The spectators were actually disappointed and complained because of lack of thrills due to ripping and throwing off of tires during the race.

Carl Fisher, president of the Speedway, Indianapolis, stated that never in the history of automobile racing could a driver feel so safe because of the wonderful consistent performance and endurance of Silverstown tires. It was a great race and the greatest victory for Silverstown tires.

More Young Partners For Goodyear Company; Employees Buy Stock

Stockholders of the Goodyear Tire and Rubber company voted unanimously Tuesday to increase the common capital stock of the company, and immediately thereafter passed a resolution enabling the management to extend its plan of making "young partners" and stockholders of members of the organization, at home and throughout the country.

The resolution provided for setting aside \$1,750,000 of the new issue, to be sold to employees, other than officers and directors, at par. A quarter million dollars of the stock will be distributed at once to a list of men in the organization, and the rest of the distribution will cover a period of years. Branch and district managers, department managers and other employees who are stockholders have a different feeling toward the company—knowing they are part of it and more than merely employees. Much of Goodyear's success and initiative at home and abroad are attributed to the fact that Goodyear men of conspicuous ability and loyalty are stockholders, and feel that they are working for themselves as well as for their employers. Mutual interest and responsibilities are thus safeguarded.

Justified for what has already been accomplished and what is planned is found in the fact that the year company, which did a few hundred thousands of dollars of business its first year, did a gross business of nearly \$22,000,000 in 1914 and is now busier than at any other stage of its existence.

Our Fool Human Habit.
(From Judge.)
We lay our burdens down at night.
Dream of them till the morn; and then
We scarcely wait till it is light
To crawl back under them again.

"BRAD" NOW CONNECTED WITH KING MOTOR CAR

Popular Auto Man Has Made
Name for Himself in Selling
and Advertising.

Detroit, Mich., June 5.—(Special.)—H. C. Bradford, of Indianapolis, has migrated to the world's greatest automobile manufacturing center. He is now associated with the King Motor Car company, of this city, manufacturer of eight and four-cylinder automobiles. Bradford, who is better known as "Brad of the Cole," has lately been associated with the Premier Motor Manufacturing company.

For four years Bradford was associated with J. J. Cole, manufacturer of the Standardized Cole, for three years he traveled continuously the United States and Canada, was known as Cole's globe-trotter, and given universal credit for putting Cole on the map. He was connected with sales and advertising—chiefly in co-operating with dealers in the field.

Directly or indirectly, he has been connected with the important movements in the automobile industry for the past four years. During his association with Frank E. Smith at the Premier Motor Manufacturing company, this organization has been developing a wonderful business.

The King Motor Car company is determined upon the building of a permanent, concrete selling force. They fully realize that merchandising is the problem of the automobile industry today, and have foresight to know that the best place to devote their efforts for a few years is with the retail automobile dealer. Mr. Bradford will have charge of a new department created by the King Motor Car company, which deals specially with this kind of work.

The King Motor Car company is now enjoying a successful business, without competition in their price in the eight-cylinder market. They have a strong manufacturing organization, and the business is in the hands of capable automobile men. Their president being J. O. Baylentine, secretary and treasurer, F. A. Vollbrecht, vice president and in charge of advertising, Armas Ward, Jr.; while W. L. Daly is sales manager.

Not only has the King Motor Car company enjoyed a prosperous business on this hemisphere, but its foreign business for eight-cylinder cars, it is reported, is the largest in the country at the present time for this model. The King company was the first to ever ship a trainload of eight-cylinder motor cars, which a few weeks ago moved forward to their Chicago dealer.

Vollbrecht, vice president and in charge of advertising, Armas Ward, Jr.; while W. L. Daly is sales manager.

Not only has the King Motor Car company enjoyed a prosperous business on this hemisphere, but its foreign business for eight-cylinder cars, it is reported, is the largest in the country at the present time for this model. The King company was the first to ever ship a trainload of eight-cylinder motor cars, which a few weeks ago moved forward to their Chicago dealer.

The King Motor Car company is now enjoying a successful business, without competition in their price in the eight-cylinder market. They have a strong manufacturing organization, and the business is in the hands of capable automobile men. Their president being J. O. Baylentine, secretary and treasurer, F. A. Vollbrecht, vice president and in charge of advertising, Armas Ward, Jr.; while W. L. Daly is sales manager.

The Submarine

In Its Present State of Efficiency It Is the Most Powerful Weapon of Offense and Defense, and Its Value Has Long Been Recognized by Some of the Best Known Students of Naval Warfare, Including Our Own Admiral Dewey

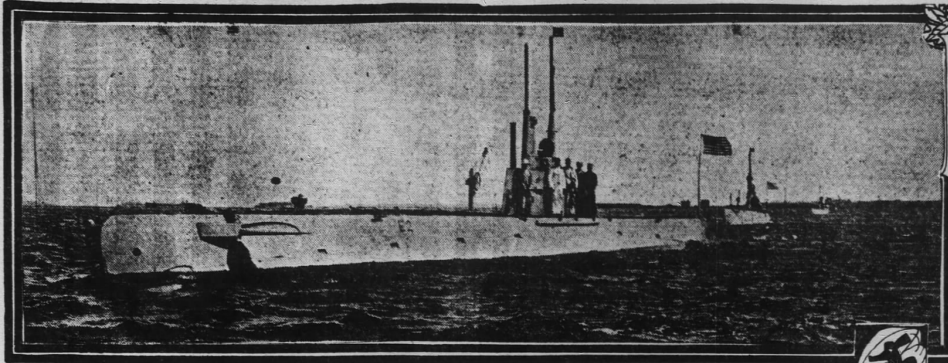

Photo by E. Mueller Jr.

LED by the E-2, One of the Latest Types of Below-the-Water Fighters, a Submarine Flotilla of the American Navy Is Seen Passing in Review. According to Josephus Daniels, Secretary of the Navy, the United States Has Authorized, Built and Building, Seventy-four Submarines.

IT WAS many years ago that Jules Verne wrote of the adventures of Captain Nemo and his fabulously submarine, the Nautilus. People accepted the adventures as good because nothing more. But now it is known that Verne, dreaming his unbelievable vision, was even then pointing a prophetic finger to the most dangerous engine of war in the history of the world.

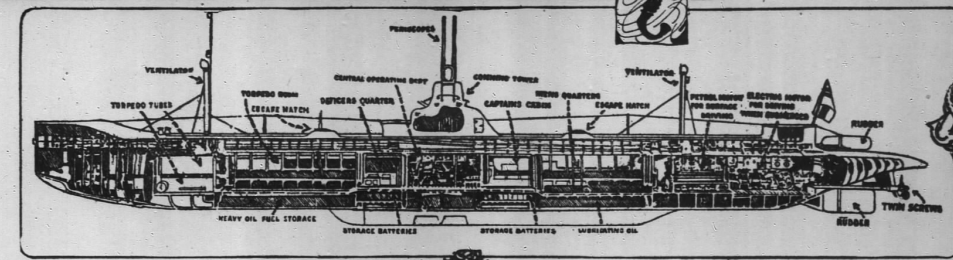

Naval experts of the nations at each other's throats realized early in the present conflict that the submarine had to be reckoned with. At first it picked up unprotected and isolated ships of small tonnage. Then came the sinking of his Britannic majesty's cruisers Aboukir, Hogue and Cressy as they lay gray-bulked against a leaden sky in the North Sea.

1,000-Mile Cruising Area.

When the "air tank" in the cold bowels of the German submarine U-9 coughed and a spindle torpedo left its tube to strike death to the Aboukir; when it coughed again and the Hogue went to the bottom, and still again to rip open the steel vitals of the Cressy, three messages were given to the world (that part of it interested in warfare), each identical with the other:

THE SUBMARINE IS A GREAT OFFENSIVE AS WELL AS DEFENSIVE NAVAL CRAFT.

That the general board of the United States navy realized the value of the submarine as an auxiliary arm in time of conflict was indicated recently in a dispatch that trickled over the wires from Washington. It said that the board had learned several lessons from the war on the other side of the Atlantic, among them that the submarine is a most powerful weapon not only for coast defense but for offense, if

AN INTERIOR View of a German Submarine. Note the Captain's Cabin. It Is in This Small Room That the Operations of the Submarine Are Mapped Out. To the Left of the Captain's Cabin Is the Central Operating Department. From Where, Through the Medium of the Periscope, He Directs the Deadly Voyage of the Torpedo. This Weapon Is Shot From a Tube Located in the Bow of the Vessel. The Escape Hatches, the Only Entrances and Exits to the Submarine, Are Made Air and Water Tight When the Boat Is Submerged.

they have a working base within 1,000 miles of the enemy.

"Fortunately for the Germans," a naval expert was quoted as saying in this dispatch, "their submarines were handy on the two occasions when they engaged the British battle cruisers, and the British retired as soon as the Germans got within the protection zone of submarines."

Which lends confirmation to a statement often made: The only safety for a big warship when threatened by a submarine lies in flight. But even the passenger craft, Lusitania, with all her speed, fell easy victim to the deadly tubes of the "water bug."

Great Difference in Cost.

That the general board of the United States navy will emphasize the necessity for an increased number of submarines, as indicated in the Washington dispatch, opens the way for an interesting comparison as to the cost of the submarine and the battleship. It shows that the little "water bug," capable of sending the greatest fighting boat to her doom in a few minutes, can be built for a fraction as much as the big ship.

For instance, it was announced last year that Congress had appropriated money for two dreadnoughts, not to exceed in cost \$7,800,000 each. To the average person, one not versed in naval matters,

it might seem that \$7,800,000 was to cover the entire construction of these vessels. As a matter of fact, our government cannot have built and fully equipped a modern battleship, ready for active service, for much less than \$15,000,000.

Fighting craft of the Pennsylvania class, when built by a private contractor, cost something like this:

Construction and maintenance	\$7,800,000
Armament and equipment	7,013,410
Equipment	110,000

Total \$14,923,410

Now to compare this to the cost of the submarine. That type which the navy has been using for the last five years, the coast defense submarine, costs, on an average, \$450,000 to build. These vessels can defend a long stretch of coast, having a cruising radius of 400 miles. The harbor defense submarine, provision for which was made in the last naval act, will be smaller than the above type, both in size and cruising radius, but will cost less—about \$300,000 apiece.

New Type More Costly.

In other words, thirty-three coast defense submarines, or fifty harbor defense submarines, could be built for the price of one dreadnought.

The Ordnance Bureau of the Navy Department recently perfected a new long-range torpedo. The highest cost estimate of a sea-going submarine capable of handling this new weapon, a bigger and more

dangerous vessel than any of the sort now in existence, follows:

Construction and maintenance	\$1,110,000
Armament and equipment	255,000
Equipment	16,000

Total \$1,381,000

The battleship Connecticut, according to the latest Naval Year Book, cost the United States \$1,101,888.80 for her maintenance during a single year. This, of course, does not include the vast amount expended for her construction and armament. In the United States navy there are about twenty vessels of the Connecticut type. In contrast to this the government expends only \$50,000 on the most expensive submarine when in commission the full twelve months.

Always Dangerous Foe.

Is the growing consideration which the world powers are giving to the submarine to be wondered at in view of its proved efficiency and low cost of construction and maintenance?

The total number of submarine boats on the navy list of France is given as seventy-six, though some authorities doubt whether more than half are actually available for service. England had eighty-four at the beginning of hostilities, and there is no doubt that she is building others as rapidly as possible.

The true strength of Germany's "water bug" fleet is a matter of much conjecture

and give a good account of itself. It is the policy of the Navy Department to repair submarines in the winter time, when they are not needed for practice, which, no doubt, accounts for the pessimistic statement of Admiral Fletcher.

Dewey Favors Submarines.

Awash or submerged, the submarine travels invisibly, and every gold-braided officer, every blue-suited jackle of the armed forces seeking to destroy each other must know that at any hour of the day or night, he the weather cloudy or fair, a steel fish may glide through the waters without warning and send him and his sailor brethren to a quick death. Admiral Dewey recognized this important factor in the use of the submarine nearly fifteen years ago.

He said at that time: "From what I have seen of the work of the submarines it is my belief that I could not have held that bay (Manila Bay) with my squadron of fifteen ships if the enemy had had two of these boats with determined operators on board. The strain would have worn us out. We should have had to be constantly on watch, never knowing when the blow would fall. The human frame could not have stood it."

Only four inches in diameter, the periscope is painted a dull gray. This makes it invisible, or nearly so, even on a clear day. On a cloudy day, or at night, chances of it being detected are slight. The periscope, by means of lenses, casts into the conning tower of the submarine a reflection

of the surface, or, as they term it, "going light." It can be made to sink so that the decks are "awash," or about level with the waves, by the simple expedient of flooding these tanks. If it becomes necessary to dive or to disappear entirely beneath the surface, this is done with the aid of horizontal bars controlled by electric mechanism, and not by taking more water into the tanks.

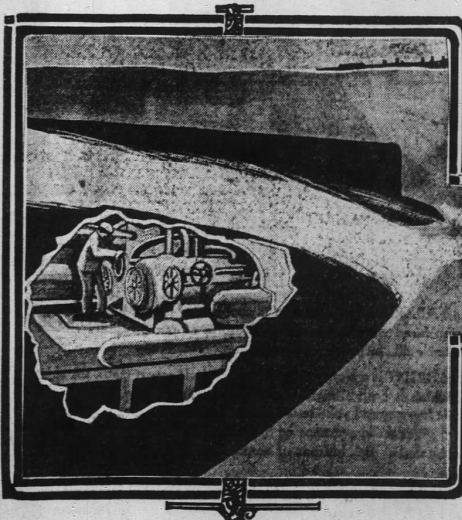

All men aboard submarines are skilled mechanics in gas engines and electrical work. When a submarine is ordered from its base, or to "clear for action," there are hundreds of things to be looked after. The mechanical part of the upper deck is inspected, and then the crew descends through the manhole.

The only exit, the manhole, is screwed down and made air and water tight. Should an air pump or other part of the mechanism show trouble one of the mechanics is sent to repair it. He works hard in a space where there is no room to turn around, lying between moving engine parts, soaked with oil and gasoline. The captain takes his place in the chartroom, the most important part of the submarine.

Speaking tubes, levers and push buttons are on all sides of the room. From here the captain directs the movements of the boat and also the firing of the torpedoes. These splendidly worked out weapons may be called small boats in themselves. Of a cigar-like shape, they conceal accurate mechanical works, machinery and air chambers, besides the deadly explosive. The torpedoes are fired from a tube by compressed air.

Wells, in his "Anticipations," said that he could foresee no mission in the game of war for the submarine except to get itself wrecked or to suffocate its crew. In this instance Wells anticipated with no degree of accuracy.

Milford Lake, the American inventor of the even keel of submarine, has recently set himself to anticipating the future of

A DIAGRAM Which Shows the Discharge of a Torpedo From One of the Tubes of a Submarine by Means of Compressed Air. It Is Said That the Latest Type of German Undersea Boats Use Compressed Air of Approximately 4,000 Pounds to the Square Inch. It Requires a Well-Trained Crew to Bring a Big Torpedo Into a Tube Correctly in the Small Space Available in the Torpedo-Room.

SECTION of a Modern Torpedo, the Most Splendidly Worked Out Weapon, but Also the Most Dreadful. A, Firing Pin; B, Guncotton, or Other High Explosive; C, Compressed Air; D, Control Chamber; E, Engine; F, Gyroscopic; G, Raddlers. The Outer Shell of Most Submarines Is Built of Steel and Bronze. The Germans Are Using a Torpedo Which, Should It Fail to Hit a Target After Speeding 1,500 Yards, Sinks Because Water Automatically Enters It Through the Flood Valve. This Removes All Danger for Shipping and Prevents the Enemy From Studying Its Supposedly Original Features.

THE Davis Torpedo, an American Invention, Which Discharges an Armor-Piercing Projectile on Striking a Vessel. A, Firing Pin; B, Eight-Inch Gun; C, Projectile; D, Propeller and Raddlers of Torpedo.

Some navy lists credit her with thirty, while others place the number higher.

Though Rear Admiral Fletcher of the United States navy admitted last fall before a congressional committee that this country had only one submarine ready for active service, it is reasonable to believe that every boat of this type can put to

this craft which has revolutionized naval warfare. He has arrived at this conclusion: "Each successful submarine attack, while horrible in itself, only serves to prove the contentions of those who know the submarine and its capabilities that it will prove the greatest peace agent that science has yet produced."

TWO SUITS and a HAT for the YOUNG GIRL

S MALL, TAILORED HAT, shown in center is of brown braid, the underbrim faced with brown satin. Rosette of tan grosgrain ribbon with tan quill, form only trimming.

T O THE RIGHT is a jaunty tailored suit of dark covert cloth, the skirt of which is built straight and with a slight fullness. Hip-length jacket has a round yoke to which the body of the coat is gathered. A wide band gives an appearance of flatness to the hips, and into this the coat is fitted by darts. Ball buttons of enamel provide an attractive bit of trimming.

S MART TAILLEUR of pepper-and-salt checked worsted is shown on left. Hip-length cutaway jacket, the edges of which are bound; braid adorns the sides. Closely laid pleats insure an ample fullness to the skirt, which is short and displays to advantage the boots of patent leather, with tops of gray kid, snugly buttoned.

SOCIAL LIFE IN MACON

Macon, Ga., June 4.—(Special Correspondence.)—As a culmination to the long list of prenuptial affairs which have been given during the past two weeks for the prospective bride and groom, the marriage of Miss Lila Mae Wise and Mr. Eugene Williams took place Wednesday evening at 8 o'clock at the home of the bride's parents, Mr. and Mrs. O. H. Williams. The ceremony was performed by Rev. John S. Burdette, assisted by Mr. J. H. Stetson. The bride wore a gown of white tulle with a long train, and the groom wore a tuxedo. The wedding party consisted of the bride, groom, bridesmaids, and groomsmen. The reception was held at the home of the bride's parents. The wedding party consisted of the bride, groom, bridesmaids, and groomsmen. The reception was held at the home of the bride's parents.

COVINGTON, GA.

One of the prettiest and most delightful social events of the early summer season was the reception at which Mrs. S. H. Adams and Miss Beveline Adams entertained the Sigma Xi fraternity and their young lady friends on Tuesday evening last, at their home on Floyd street.

Mr. Cooper was the gracious hostess to a large number of friends on Wednesday afternoon who were entertained at a beautiful reception in the home of her parents, Mr. and Mrs. Charles H. White.

Commencement exercises of the Covington school closed on Friday evening with the senior class presentation of the diploma to the graduates. There were sixteen members of the class who graduated. The graduates were: Misses Beveline Adams, Loretta Meade, and others.

Miss Christine White entertained the members of her bridge club most delightfully Thursday afternoon at the home of her parents, Mr. and Mrs. Charles H. White.

Mr. James P. Rogers will entertain the United Daughters of the Confederacy with a garden party Tuesday afternoon, June 8, at her beautiful home on Floyd street.

EATONTON, GA.

The leading social event of the week past was the reception on Friday evening at the home of Mr. and Mrs. W. B. Owens, Jr., at their beautiful home on Floyd street.

Mr. Frank Polver entertained at a most beautiful home party the past week-end at his home in the avenue. The party was given by Mrs. John Booth, Miss Rosalie Booth, Colonel Booth, and Colonel Joseph Booth.

Miss Eunice Bronson is entertaining an attractive group of girls this week at the "Colonade" at home party. A number of delightful affairs are being given by the party.

LAFAYETTE, GA.

The embroidery circle was delightfully entertained last week by Mrs. P. Wright at Wright's Mineral Spring, a summer resort three miles from Lafayette. The party motored to the springs in the forenoon. At noon a light luncheon was served.

An interesting event of next week will be the wedding of Miss Beulah Adams, daughter of Mr. Gordon Adams, of Rome, announced by her daughter, Laurie Eleanor, to Dr. Paul A. Adams, of Valdosta, on Tuesday night, June 1. Rev. H. H. Shell, of the First Baptist church, Valdosta, performed the ceremony.

Dr. and Mrs. W. K. Rich left on the mid-night train for Valdosta, where they will make their home.

TOOLE-KISH.

Bainbridge, Ga., June 5.—(Special.)—Mr. and Mrs. B. Toole, of Bainbridge, announce the marriage of their daughter, Laurie Eleanor, to Dr. Paul A. Adams, of Valdosta, on Tuesday night, June 1. Rev. H. H. Shell, of the First Baptist church, Bainbridge, performed the ceremony.

Dr. and Mrs. W. K. Rich left on the mid-night train for Valdosta, where they will make their home.
